Flint Emergency Expenditures

State of Michigan

Released:
January 2020

On January 5, 2016, former Governor Rick Snyder declared a state of emergency for Genesee County (referred to as the Flint declaration of emergency) due to the ongoing health and safety issues caused by elevated lead levels in the City of Flint's drinking water. The Legislature enacted numerous appropriations to address this situation, both as supplemental appropriations to and transfers within the fiscal year 2016, 2017, and 2018 budget and spending authorizations provided in the fiscal year 2017, 2018, and 2019 budgets. As of September 30, 2019, appropriations totaled \$339.5 million and 10 State departments had expended a total of \$289.7 million. Public Act 3 of 2016 requires the Office of the Auditor General to audit the use of the funds appropriated for this emergency and report at a minimum of every six months until the funds are expended. This is our eighth report on the expenditure of these funds.

BACKGROUND

Public Act 3 of 2016 requires the Auditor General to conduct an audit of the use of the funds appropriated for the Flint declaration of emergency and to continue to audit and report on the use of these funds every six months until the funds are expended. Due to the ongoing nature of the audit, not all reported expenditures were audited by the end of our fieldwork. Reported expenditures not subject to audit during the prior or current audit will be considered for audit during our next audit of the Flint Emergency Expenditures, unless otherwise noted. State agencies prepare exhibits based on expenditures reported to the State Budget Office (SBO).

AUDIT OBJECTIVE

To report State agencies' expenditures of the Flint declaration of emergency appropriations.

CONCLUSION

Information provided.

FACTORS IMPACTING CONCLUSION

DESCRIPTION

On January 5, 2016, former Governor Rick Snyder declared a state of emergency for Genesee County (referred to as the Flint declaration of emergency) due to the ongoing health and safety issues caused by elevated lead levels in the City of Flint's drinking water. The state of emergency expired August 14, 2016.

The Legislature enacted numerous appropriations to address this situation, both as supplemental appropriations to and transfers within the fiscal year 2016, 2017, and 2018 budget and spending authorizations provided in the fiscal year 2017, 2018, and 2019 budgets. As noted below, 10 State departments had received appropriations totaling \$339.5 million as of September 30, 2019, the end of the audit period for this report:

Public Act 3 of 2016 requires the Office of the Auditor General (OAG) to audit the use of the funds appropriated for this emergency and report at a minimum of every six months until the funds are expended. This is our eighth report on the expenditure of these funds.

AUDIT SCOPE, METHODOLOGY, AND OTHER INFORMATION

AUDIT SCOPE

To determine if the expenditures charged to Flint declaration of emergency appropriations were appropriate and to report those expenditures. Our audit was limited to expenditures reported by September 30, 2019 and funded by Public Act 143 of 2015; Public Acts 3, 24, 249, 268, and 340 of 2016; Public Acts 107 and 108 of 2017; and Public Act 207 and 265 of 2018.

Due to the ongoing nature of the audit, not all reported expenditures were audited by the end of our fieldwork. Reported expenditures not subject to audit during the prior or current audits will be considered for audit during our next audit of the Flint Emergency Expenditures, unless otherwise noted. We conducted this performance audit in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our objectives.

PERIOD

Our audit procedures, which included audit planning, audit fieldwork, report preparation, and quality assurance, generally covered April 1, 2019 through September 30, 2019.

METHODOLOGY

We conducted various audit planning activities during our first audit to develop a basis for defining our audit objectives and scope. Because this audit was a continuation of the first audit, we utilized the same objectives and scope. During this audit, we:

- Continued to meet with Office of Internal Audit Services and department staff to enhance our understanding of the controls established over expenditures and reporting.
- Reviewed SBO reports to gain an understanding of expenditures reported by State departments.

OBJECTIVE #1

To determine the appropriateness of State agencies' expenditure of the Flint declaration of emergency appropriations as of September 30, 2019.

To accomplish this objective, we:

- Interviewed management and staff from State departments appropriated Flint emergency funding along with staff from local agencies to obtain an understanding of their expenditures and related purchasing processes, payment mechanisms, and monitoring activities.

- Reviewed source documentation supporting selected expenditures. Our samples were judgmentally and randomly selected. Therefore, we could not project the results to the overall populations.

OBJECTIVE #2

To report State agencies' expenditures of the Flint declaration of emergency appropriations.

To accomplish this objective, we:

- Updated the account coding used by 10 State departments for expenditure of appropriations.
- Extracted the expenditures charged to the appropriations from MAIN and SIGMA.
- Obtained selected expenditure data from SBO.

CONCLUSIONS

We base our conclusions on our audit efforts and any resulting material conditions*, reportable conditions*, or observations.

SUPPLEMENTAL INFORMATION

Our audit report includes supplemental information presented as Exhibits #1 through #10.

Occasionally, amounts appropriated, funding allocations, total expenditures, or expenditures subject to review may change between reports. In most instances, this is a result of agency coding changes, expenditure transfers, or errors identified during our review of expenditures. Exhibits are adjusted as we become aware of these changes.
