#### STATE OF MICHIGAN

GRETCHEN WHITMER, Governor

# **DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET**

February 16, 2022

The Honorable Gretchen Whitmer Governor, State of Michigan,

Members of the Legislature State of Michigan,

Retirement Board Members and Members, Retirees and Beneficiaries

Ladies and Gentlemen:

We are pleased to present the annual comprehensive financial report of the Michigan State Police Retirement System (System) for fiscal year 2021.

#### INTRODUCTION TO REPORT

The System was established by legislation under Public Act 251 of 1935. It now operates under the provisions of Public Act 182 of 1986, as amended, and is administered by the Office of Retirement Services (ORS). The number of active and retired members and beneficiaries of the System is presented in Note 1 of the financial statements in the Financial Section in this report. The purpose of the System is to provide retirement, disability, death, and healthcare benefits for all State Police officers. The services performed by ORS staff provide benefits to members, retirees, and beneficiaries.

#### Responsibility

Responsibility for both the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with the leadership team of the System. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the System.

#### Internal Control Structure

The leadership team of the System is responsible for maintaining adequate internal accounting controls designed to provide reasonable assurance that transactions are executed in accordance with management's general or specific authorization and are recorded as necessary to maintain accountability for assets and to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America.

The internal control structure is designed to provide reasonable assurance regarding the safekeeping of assets and reliability of all financial records.

#### **LETTER OF TRANSMITTAL**

The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits likely to be derived and that the valuation of costs and benefits requires estimates and judgments by management. This internal control structure includes maintaining written policies and procedures. Discussion and analysis of fiduciary net position and related additions and deductions are presented in the Management Discussion and Analysis which can be found immediately following the Independent Auditor's Report.

#### Independent Auditors and Actuary

The Office of the Auditor General (OAG), independent auditors, conducted an annual audit of the System. The independent auditor's report on the System's financial statements is included in the Financial Section of this report. An actuarial valuation is conducted annually. The purpose of the valuation is to evaluate the mortality, service, compensation, and other financial experience of the System and to recommend employer contribution rates. The annual actuarial valuation was completed by Gabriel Roeder Smith & Company for the fiscal year ended September 30, 2020 and recommends employer contribution rates for the fiscal year ended September 30, 2022. Actuarial certification and supporting statistics are included in the Actuarial Section in this report.

#### Management's Discussion and Analysis (MD&A)

Generally Accepted Accounting Principles (GAAP) require that management provide a narrative introduction, overview, and analysis to accompany the Basic Financial Statements in the form of MD&A. This letter of transmittal is intended to complement MD&A and should be read in conjunction with it. The MD&A can be found immediately following the Independent Auditor's Report.

#### PROFILE OF THE GOVERNMENT

The State Police Retirement System was created by Public Act 251 of 1935 and later superseded by Public Act 182 of 1986. A 9-member board, under the direction of a chairperson elected from the membership, and the director of the Department of Technology, Management, and Budget (DTMB), govern the System. All individuals hired before June 10, 2012, are members of the legacy defined benefit pension plan, and those hired on or after June 10, 2012 are members of the Pension Plus Plan. The System serves over 5,100 members and is funded by employer contributions, member contributions, and investment earnings. A detailed plan description is included in Note 1 of the Financial Section in this report.

#### **ECONOMIC CONDITIONS AND OUTLOOK**

Despite a long term mix of both challenging and robust economic times, the System continues to show steady performance.

#### Investments

The State of Michigan Investment Board is the investment fiduciary and custodian of all investments of the System pursuant to State law. The primary investment objective is to maximize the rate of return on the total investment portfolio, consistent with a high degree of prudence and sufficient diversity to eliminate inordinate risks and to meet the actuarial assumption for the investment rate of return. The investment activity for the year produced a total rate of return on the portfolio of 27.2 percent for the Pension Plan and 26.9 percent for the Other Postemployment Benefits (OPEB) Plan. For the last five years, the System has experienced an annualized rate of return of 12.0 percent for the Pension Plan and 11.9 percent for the OPEB Plan. A summary of asset allocation and rates of return can be found in the Investment Section of this report.

#### **Accounting System**

Transactions of the System are reported on the accrual basis of accounting. Revenues are recorded when earned, and expenses are recorded when incurred. Participants' benefits are recorded when payable by law. We believe that the accounting and administrative internal controls established by the System provide reasonable assurance the System is carrying out its responsibilities in safeguarding its assets, in maintaining the reliability of the financial records for preparing financial statements, and in maintaining accountability for its assets.

#### **Funding**

Funds are derived from the excess of additions to plan fiduciary net position over deductions from plan fiduciary net position. Funds are accumulated by the System to meet future benefit obligations to retirees and beneficiaries. The

#### **LETTER OF TRANSMITTAL**

percentage computed by dividing the actuarial value of assets by the actuarial accrued liability is referred to as the "funded ratio." This ratio provides an indication of the funding status of the System and generally, the greater this percentage, the stronger the System.

**Pension –** The actuarial value of the assets and actuarial accrued liability of the System were \$1.5 billion and \$2.4 billion, respectively, resulting in a funded ratio of 65.1 percent on September 30, 2020. A historical perspective of funding levels for the Pension Plan is presented on the Schedule of Funding Progress in the Actuarial Section of this report.

**OPEB** – Prefunding for OPEB began in fiscal year 2013. The actuarial value of the assets and actuarial accrued liability for OPEB were \$281.0 million and \$729.5 million respectively resulting in a funded ratio of 38.5 percent at September 30, 2020. A historical perspective of funding levels is presented on the Schedule of Funding Progress in the Actuarial Section of this report.

#### **MAJOR GOALS ACCOMPLISHED**

**Pension statements go paperless for online account holders** - In October, pension statements for members of the public school, state employee, and state police retirement systems with active online accounts went paperless. Nearly 185,000 customers, which is almost half of the retiree population served by ORS, shifted to digital statements. The statements are still available in the retiree's miAccount. Retirees can choose to opt back in to paper statements if desired. After five statement cycles we have saved over \$560,000 in printing and mailing costs.

**Newsletters shift to quarterly publications** - Beginning in March 2021, both the *Connections* and *Proactive* newsletters — for our retired and active customers, respectively — changed from biannual to quarterly publications. The printed *Connections* newsletter also went entirely digital. (The *Proactive* newsletter was already digital.) We doubled our efforts to deliver more timely and relevant information in a predictable format, maintaining a digital presence through the pandemic and beyond. Historically the printed *Connections* newsletter required preparations months in advance, which was a limiting factor in the production process. We also will save over \$30,000 a year in printing costs by moving *Connections* to digital delivery.

**State police presentations recorded** - The state police *Pre-Retirement Orientation* for Defined Benefit plan members within five years of retirement and the state police *New Employee Orientation* for Pension Plus participants have been recorded for use on demand. These recorded presentations allow for consistent, repeatable delivery of complex retirement plan information with the added benefit of 24/7 access. Viewers can now pause and re-watch any segment as they please, adapting the learning experience to meet their specific needs. This supports our goal to provide our members and participants with what they need when they need it to achieve a secure retirement.

**Infographics share remote work successes** - As we adapted to remote work, ORS staff found new ways to engage customers and keep our work visible. Over the course of a year, leaders of each process reported notable work that was completed in their area each month. These reports were then converted into infographics representing the accomplishments of the business processes and shared regularly on our Facebook page. These posts were consistently among the top five in engagement for every month of the campaign.

**Regular one-on-one meetings sustain relationships, performance** - One-on-one meetings between leaders and their direct reports have been a standard practice for several years at ORS. But with the disruption and isolation of remote work, these no-less-than-biweekly meetings have proved vital to build and maintain positive relationships, foster effective communication, and support performance management. Every leader is expected to establish one-on-one meetings with each of their direct reports and to adhere to specific outcomes.

Leadership fosters open communication with town halls, blogs, videos - Over the past year, we have normalized more frequent communications from our leadership team to staff. In addition to the biweekly blogs produced by ORS Director Anthony Estell, the ORS division directors and senior executive assistant began producing biweekly videos for staff. The result is a weekly cadence of leadership communication. Additionally, we have continued quarterly town hall events that have been heavily dedicated to recognition, significant updates from leadership, and leadership fielding questions and answers from staff. These have all proved beneficial in maintaining an executive presence and being open and transparent with timely communications.

#### **LETTER OF TRANSMITTAL**

**ORS exploring different approach to IT development** - In fall 2021, we began exploring a new method to develop technical solutions for the business with our partners in the DTMB Application Support Team. Historically, ORS has used a waterfall approach to IT projects which involves fully developing a product before delivery. Value is gained upon project completion, not during development and testing. This pivot in practice adopts an iterative approach, reducing the cycle from development to market. The time savings comes from first delivering simple, viable products and adding features and complexity in subsequent releases. ORS has already completed one release using this methodology. The new approach also introduced ORS to Azure DevOps software for planning and organizing the related business activities.

**ORS reaches new milestone for monthly pension payments** - This July, for the first time in ORS' history, we issued over 300,000 pension payments in a single month. The new milestone was confirmed after the monthly pension payroll processed in mid-July for all retirement systems administered by ORS.

#### **HONORS**

**Public Pension Standards Award** – ORS was awarded the 2021 Standards Award from the Public Pension Coordinating Councils Standards Program (PPCC) for both funding and administration. ORS has received these awards every year since 2004. The PPCC Standards reflect expectations for public retirement system management and administration and serve as a benchmark for all DB public plans to be measured.

**Government Finance Officers Association Award** – The Government Finance Officers Association (GFOA) of the United States and Canada awarded the retirement system with the Certificate of Achievement for Excellence in Financial Reporting for our fiscal year 2020 Annual Comprehensive Financial Report (ACFR). This marks the 30<sup>th</sup> consecutive year ORS has received this prestigious award.

#### **ACKNOWLEDGEMENTS**

The preparation of this report was accomplished with the dedication and cooperation of many people. It is intended to provide complete and reliable information as a basis for making management decisions, as a means of determining compliance with legal provisions, and as a means for determining responsible stewardship of the funds of the System.

We would, therefore, like to express our appreciation for the assistance given by staff, the advisors and the many people who contributed to its preparation. We believe their combined efforts have produced a report that will enable employers and plan members to better evaluate and understand the Michigan State Police Retirement System. Their cooperation contributes significantly to the success of the System.

Sincerely,

Michelle Lange, Acting Director

Michelli Lange

Independent Auditor's Report on the Financial Statements and Other Reporting Required by *Government Auditing Standards* 

Detective Sergeant Mitchell Stevens, Chair Michigan State Police Retirement System Board and Ms. Michelle Lange, Acting Director Department of Technology, Management, and Budget and Mr. Anthony J. Estell, Director Office of Retirement Services

Dear Detective Sergeant Stevens, Ms. Lange, and Mr. Estell:

#### Report on the Financial Statements

We have audited the accompanying financial statements of the Michigan State Police Retirement System, a fiduciary component unit of the State of Michigan, as of and for the fiscal year ended September 30, 2021 and the related notes to the financial statements, which collectively comprise the System's basic financial statements as listed in the table of contents.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion

In our opinion, the financial statements referred to in the first paragraph present fairly, in all material respects, the fiduciary net position of the Michigan State Police Retirement System as of September 30, 2021 and the changes in fiduciary net position for the fiscal year then ended in accordance with accounting principles generally accepted in the United States of America.

#### Emphasis of Matter

As discussed in Note 8 to the financial statements, beginning net position for the pension and OPEB plans was increased by \$11.2 million and \$8.4 million, respectively, to account for additional employer contributions due to the System that should have been recognized in the prior fiscal year. Also, the System adopted Governmental Accounting Standards Board Statement No. 84, *Fiduciary Activities*, for the fiscal year ended September 30, 2021. Our opinion is not modified with respect to these matters.

Detective Sergeant Mitchell Stevens, Chair Ms. Michelle Lange, Acting Director Mr. Anthony J. Estell, Director Page 2

#### Other Matters

#### Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, schedule of changes in net pension liability, schedule of changes in net OPEB liability, schedules of contributions, schedules of investment returns, and related note, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the System's basic financial statements. The supporting schedules and the introductory, investment, actuarial, and statistical sections are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The supporting schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supporting schedules are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory, investment, actuarial, and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

#### Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we will also issue a report on our consideration of the System's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the System's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the System's internal control over financial reporting and compliance.

Sincerely,

Doug Ringler **Auditor General** February 16, 2022

Dove Kingler

#### MANAGEMENT'S DISCUSSION AND ANALYSIS

Our discussion and analysis of the Michigan State Police Retirement System's (System) financial performance provides an overview of the System's financial activities for the fiscal year ended September 30, 2021. Please read it in conjunction with the transmittal letter in the Introductory Section on page 4 and the basic financial statements, which follow this discussion.

#### **FINANCIAL HIGHLIGHTS**

- System assets exceeded liabilities at the close of fiscal year 2021 by \$2.2 billion (reported as net position restricted for Pension Benefits and OPEB). Fiduciary net position is restricted to meet future benefit payments.
- Additions for the year were \$602.4 million, which are comprised primarily of contributions of \$126.5 million and investment gains of \$475.7 million.
- Deductions increased over the prior year from \$183.1 million to \$194.4 million or 6.2%. This increase is the
  result of increased pension benefit payments.

# THE STATEMENT OF PLAN FIDUCIARY NET POSITION AND THE STATEMENT OF CHANGES IN PLAN FIDUCIARY NET POSITION

This Annual Comprehensive Financial Report (ACFR) consists of two financial statements; *The Statement of Pension Plan and Other Postemployment Benefit Plan Fiduciary Net Position* (page 18) and *The Statement of Changes in Pension Plan and Other Postemployment Benefit Plan Fiduciary Net Position* (page 19). These financial statements report information about the System, as a whole, and about its financial condition that should help answer the question: Is the System, as a whole, better off or worse off as a result of this year's activities? These statements include all assets and liabilities using the economic resources measurement focus and the accrual basis of accounting. Under the accrual basis of accounting, all revenues and expenses are taken into account regardless of when cash is received or paid.

The Statement of Pension Plan and Other Postemployment Benefit Plan Fiduciary Net Position presents all of the System's assets and liabilities, with the difference between the two reported as fiduciary net position. Over time, increases and decreases in fiduciary net position measure whether the System's financial position is improving or deteriorating. The Statement of Changes in Pension Plan and Other Postemployment Benefit Plan Fiduciary Net Position presents how the System's fiduciary net position changed during the most recent fiscal year. These two financial statements should be reviewed along with the Schedule of Changes in Net Pension Liability (page 45), the Schedule of Changes in Net OPEB Liability (page 46), and Schedules of Contributions (page 47) to determine whether the System is becoming financially stronger or weaker.

#### FINANCIAL ANALYSIS

System total assets as of September 30, 2021, were \$2.3 billion and were mostly comprised of accounts receivables, investments, and securities lending collateral. Total assets increased \$427.2 million or 22.9% between fiscal years 2020 and 2021, due primarily to additions exceeding deductions.

Total liabilities as of September 30, 2021, were \$74.9 million and were comprised of accounts payable and other accrued liabilities, and obligations under securities lending. Total liabilities decreased \$.4 million or 1.0% between fiscal years 2020 and 2021 primarily due to increased obligations under securities lending.

System assets exceeded its liabilities at the close of fiscal year 2021 by \$2.2 billion. Total fiduciary net position restricted for pension and OPEB increased \$427.6 million or 23.9% from the previous year, primarily due to additions exceeding deductions.

#### MANAGEMENT'S DISCUSSION AND ANALYSIS

#### **ADDITIONS TO PLAN FIDUCIARY NET POSITION**

The reserves needed to finance pension and other postemployment benefits are accumulated through the collection of employer and employee contributions and through earnings on investments. Contributions and net investment income for fiscal year 2021 totaled approximately \$602.4 million.

Total additions for fiscal year 2021 increased approximately \$368.1 million or 157.1% from those of fiscal year 2020 due primarily to increased investment income. Total contributions decreased between fiscal years 2020 and 2021 by \$19.7 million or 13.5%, while net investment income increased \$388.0 million or 442.3%. The Investment Section of this report reviews the results of investment activity for fiscal year 2021.

#### **DEDUCTIONS FROM PLAN FIDUCIARY NET POSITION**

The primary expenses of the System include the payment of pension benefits to members and beneficiaries, payment for health, dental and vision benefits, refund of contributions, and the cost of administering the System. Total deductions for fiscal year 2021 were \$194.4 million, an increase of 6.2% over fiscal year 2020 deductions.

The health, dental and vision care expenses during the year increased by \$5.0 million or 14.5%, from \$32.0 million to \$36.7 million. The payment of pension benefits increased by \$5.9 million or 4.0% between fiscal years 2020 and 2021. In fiscal year 2021, the increase in pension benefit expenses resulted from an increase of 67 retirees and an increase in benefit payments to retirees. Administrative expenses decreased by \$110.4 thousand or 7.0% between fiscal years 2020 and 2021, primarily due to decreased pension administrative and health administrative fees. Refunds of contributions increased by \$102.6 thousand or 966.6% between fiscal years 2020 and 2021.

#### MANAGEMENT'S DISCUSSION AND ANALYSIS

#### **CHANGES IN PLAN FIDUCIARY NET POSITION**

(in thousands)

	 2021	 2020	Increase (Decrease)

End of Year	\$ 2,215,417	\$ 1,787,789	23.9 %

#### RETIREMENT SYSTEM AS A WHOLE

The System's overall Fiduciary Net Position experienced an increase in fiscal year 2021. The Statement of Changes in Plan Fiduciary Net Position included an increase in the beginning balance of \$19.6 million for a restatement the prior year as described in Note 8 – Accounting Changes and Restatements (Page 44). The System's rate of return for the Pension Plan's investments increased an overall 22.2% from 5.0% return in fiscal year 2020 to a 27.2% return during fiscal year 2021. The System's rate of return for the OPEB Plan's investments increased an overall 22.0% from a 4.9% return in fiscal year 2020 to a 26.9% return during fiscal year 2021. Management believes that the System remains financially sound and positioned to meet its ongoing benefit obligations due, in part, to a prudent investment program, cost controls, and strategic planning.

#### CONTACTING SYSTEM FINANCIAL MANAGEMENT

This financial report is designed to provide the Retirement Board, our membership, taxpayers, investors, and creditors with a general overview of the System's finances and to demonstrate the System's accountability for the money it receives. If you have any questions about this report or need additional financial information, contact the Office of Retirement Services, P.O. Box 30171, Lansing, MI 48909-7671.

#### NOTES TO BASIC FINANCIAL STATEMENTS

#### NOTE 1 - PLAN DESCRIPTION

#### **ORGANIZATION**

The Michigan State Police Retirement System (System) is a single employer, state-wide, defined benefit public employee retirement plan and a fiduciary component unit of the State of Michigan (State), created under Public Act 251 of 1935, recodified and currently operating under Public Act 182 of 1986. Section 7 of this act establishes the board's authority to promulgate or amend the provisions of the System. The board consists of nine members. Four members are appointed by the governor and consist of one officer having rank of sergeant or below, one officer having rank of lieutenant or above, one retirant, and one member of the general public to meet requirements within the act. The System's pension plan was established by the State to provide retirement, survivor, and disability benefits to Michigan State Police. In addition, the System's OPEB plan provides retirees hired prior to June 10, 2012 with the option of receiving health, dental, and vision coverage under the State Police Retirement Act. The System is a qualified pension trust fund under section 401(a) of the Internal Revenue Code.

A hybrid defined benefit and defined contribution plan was introduced for troopers and sergeants who became a member of the System on or after June 10, 2012. This plan is called the Pension Plus plan for Michigan State Police.

The System is a fiduciary component unit of the State of Michigan and its financial statements are included as a pension and other employee benefit trust fund in the State of Michigan Annual Comprehensive Financial Report.

The System is administered by the Office of Retirement Services within the Michigan Department of Technology, Management & Budget (DTMB). The Department Director appoints the Office Director, with whom the general oversight of the System resides. The State of Michigan Investment Board serves as the investment fiduciary and custodian for the System.

#### **MEMBERSHIP**

At September 30, 2021, the System's pension plan membership consisted of the following:

Inactive plan members or their	
beneficiaries currently receiving benefits:	
Regular benefits	2,587
Survivor benefits	530
Disability benefits	207
Total	3,324
Inactive plan members entitled	
to but not yet receiving benefits:	18
Active plan members:	
Vested	579
Non-vested	1,177
Total	1,756
DROP program participants	257
Total plan members	5,355

#### **NOTES TO BASIC FINANCIAL STATEMENTS**

Enrollment in the OPEB plan is voluntary. The number of participants is as follows:

#### Health, Dental and Vision Plan

Eligible participants Retirees and survivors Inactive vested and DROP members Active members <sup>1</sup>	3,081 275 1,756
Participants receiving benefits: Health Dental Vision	2,942 2,947 2,947
Expenses for the year (in thousands)	\$ 449,558
Employer payroll contribution rate	37.90%

<sup>&</sup>lt;sup>1</sup> Active member count includes Personal Healthcare Fund members eligible for the \$2,000 lump sum at termination benefit.

#### **BENEFIT PROVISIONS - PENSION**

#### Introduction

Benefit provisions of the defined benefit plan are established by State statute, which may be amended. Public Act 182 of 1986, Michigan State Police Retirement Act, as amended, establishes eligibility and benefit provisions for the defined benefit pension plan and the Pension Plus plan. Retirement benefits for defined benefit plan members are determined by final average compensation and members are eligible to receive a monthly benefit when they meet certain age and service requirements. The pension benefit for Pension Plus plan members is determined by final average compensation and years of service and members are eligible to receive a monthly benefit when they meet certain age and service requirements. In addition, the Pension Plus members' savings component includes the employee contributions into any combination of a member's 401(k), 457, or Roth 401(k) accounts, and an employer match into their 401(k) account. The System also provides duty disability, nonduty disability, and survivor benefits.

A member who leaves Michigan State Police employment may request a refund of his or her member pension contribution account. Effective in 2012, the System is contributory except for command officers. A refund cancels a former member's rights to a future pension and there is no provision for repaying the refund of contributions to restore the service represented by the refund.

#### Pension Reform 2012

The State Troopers' union and the State of Michigan negotiated a new retirement plan for new State Troopers and Sergeants. As a result, a State Trooper who became a member of the System on or after June 10, 2012, is a Pension Plus member. The Pension Plus plan pairs a guaranteed retirement income (Defined Benefit pension) with a flexible and transferable retirement investment (Defined Contribution) account. The Pension Plus plan was codified in the State Police Retirement act with the passage of Public Act 674 of 2018.

#### Regular Retirement

A pension is available to a defined benefit plan member after 25 years of credited service (employment). The pension equals 60% of a member's final average compensation and is payable monthly over the lifetime of a member. Final average compensation is the average annual salary for a member's last two years of service with the Department of State Police.

For a Pension Plus member, who became a member of the System on or after June 10, 2012, a pension is available at age 55 with 25 years of service or age 60 with 10 or more years of service. The pension equals 2% of a five-year final average compensation (excluding overtime) multiplied by the total number of years of credited service, not to exceed 25 years. After 25 years of credited service, the pension multiplier declines by 0.4% each year until reaching 0% at 30 years of service. The reduced pension multiplier applies only to years 26 through 30, not the first 25 years. Pension benefits are paid over the lifetime of a member.

#### NOTES TO BASIC FINANCIAL STATEMENTS

#### **Deferred Retirement**

A defined benefit plan member with 10 or more years of credited service who terminates employment but has not reached the age of 50 is a deferred member and is entitled to receive a monthly allowance upon reaching age 50, provided the member's accumulated contributions have not been refunded. The deferred pension is equal to 2% of the final average compensation times the years and partial years of service credit.

A Pension Plus plan member who became a member of the System on or after June 10, 2012, with 10 or more years of credited service who terminates employment but has not reached the age of 60 is a deferred member and is entitled to receive a monthly allowance upon reaching age 60, provided the member's accumulated contributions have not been refunded.

#### Nonduty Disability Benefit

A member with 10 or more years of credited service who becomes totally and permanently disabled not due to performing duties as an employee of the Michigan State Police may be eligible for a nonduty disability pension. The nonduty disability pension for a defined benefit plan member is 2.4% of the final average compensation times years and partial years of credited service (but not more than 25 years).

#### **Duty Disability Benefit**

A member who becomes totally and permanently disabled from performing duties as a Michigan State Police Officer is eligible for a duty disability pension. The amount, for a defined benefit plan member is equal to 60% of the final average compensation.

#### Survivor Benefit

Upon the nonduty death of a defined benefit plan member who completed at least 10 years of service, the surviving spouse receives a benefit based on 2.4% of the final average compensation for each year and partial year of credited service. If there is no spouse, surviving children are entitled to equally share the benefit until age 18. If death occurs in the line of duty (a duty death), the surviving spouse receives a benefit of 60% of the final average compensation. Children receive \$100 each month until age 18. A \$1,500 funeral expense is also authorized by State statute payable by the system.

#### Postretirement Adjustments

Effective October 1, 1996, the monthly pension was increased 10% if certain requirements were met. This was a one-time increase.

Each October 1, the benefits of all pension recipients increase 2% (not to exceed \$500). This non-compounding increase is paid to persons who have been retired 12 months.

A Pension Plus member who became a member of the System on or after June 10, 2012, does not receive an annual post-retirement increase.

Effective fiscal year 2016, ORS issued a supplemental payment to eligible recipients. This supplemental payment continues to be issued to eligible recipients each fiscal year, subject to an annual budget appropriation.

#### **Member Contributions**

Command Officers currently participate on a noncontributory basis. Effective October 1, 2012, troopers and sergeants hired before June 10, 2012 began contributing 1% of their compensation. Effective October 1, 2013 troopers and sergeants hired before June 10, 2012 began contributing 2% of their compensation. Troopers hired on or after June 10, 2012 contribute 4% of their compensation as described below. Under certain circumstances, defined benefit plan members may contribute to the System for the purchase of creditable service, such as military, maternity or paternity leave, Peace Corps or VISTA service. Pension Plus plan members are only eligible to receive active duty military service. If a member terminates employment before a retirement benefit is payable, the member's contribution and interest on deposit are available to be refunded. If the member dies before being vested, the member's contribution and interest are refunded to the designated beneficiaries.

#### **NOTES TO BASIC FINANCIAL STATEMENTS**

Pension Plus members who became members of the System on or after June 10, 2012, contribute 4% of their gross wages for the pension component of their plan. An additional, optional, 4% contribution of their gross wages is withheld for the savings component of their plan. The first 2% of employee contributions are directed to the member's Personal Healthcare Fund and receive an employer match of 100% up to a maximum of 2%. The next 2% employee contributions are identified as retirement savings and receive an employer match of 50% up to a maximum of 1%. These members will also receive a credit into a health reimbursement account (HRA) at termination if they have at least 10 years of service at termination. The credit will be up to \$2,000 for participants.

#### **Employer Contributions**

The statute requires that the employer contribute to finance the benefits of plan members. These employer contributions are determined annually by the System's actuary and are based upon level-percent-of-payroll funding principles so that the contribution rates do not have to increase over time.

For a Pension Plus member who became a member of the System on or after June 10, 2012, there is an employer match for retirement of 100% of the first 2% of employee deferrals for retiree healthcare up to a maximum employer contribution of 2%. In addition, employers match 50% of the next 2% of employee deferrals, up to a maximum employer contribution of 1%.

#### Deferred Retirement Option Plan

Public Act 83 of 2004 amended the State Police Retirement Act to create a Deferred Retirement Option Plan (DROP) for members with 25 years of service. This benefit program allows state police who are eligible to retire to defer their retirement and keep working for up to six years. The participant's pension amount is calculated on the day before the DROP period starts, and a percentage of the equivalent monthly pension is credited to an interest-bearing account in the participant's name. The DROP balance will be available at the time their DROP participation ends. At this time, only Defined Benefit members are eligible for DROP. The balance at the end of the fiscal year 2021 for the DROP accounts was \$61.7 million.

#### **Banked Leave Time**

Public Act 50 of 2004 amended the State Police Retirement Act to include Banked Leave Time (BLT) for members. BLT is an extension of the State's current annual leave program, which banks a predetermined number of hours per pay period. However, the BLT program will not have an effect on a member's Final Average Compensation calculation.

#### BENEFIT PROVISIONS - OTHER POSTEMPLOYMENT

#### Introduction

Benefit provisions of the postemployment benefit plan are established by State statute, which may be amended. Public Act 182 of 1986, as amended, establishes eligibility and benefit provisions for the OPEB plan. Defined benefit plan members are eligible to receive health, prescription drug, dental, and vision coverage on the first day they start receiving pension benefits (this benefit does not apply to Pension Plus members). There are no ad hoc or automatic increases. The State Police Retirement Act requires joint authorization by DTMB and the Civil Service Commission to make changes to retiree medical benefit plans.

Under the Michigan State Police Retirement Act, all defined benefit retirees have the option of continuing health, dental, and vision coverage. Retirees with this coverage contribute 5%, 10%, and 10% of the monthly premium amount for the health, dental, and vision coverage, respectively. The State funds 95% of the health and 90% of the dental and vision insurance. The employer payroll contribution rate to provide these benefits was 37.90% for fiscal year 2021.

The State Health Plan PPO is by far the most often selected health care option. This plan includes comprehensive coverage traditionally referred to as basic and major medical, with full coverage for most services received innetwork after an annual deductible is met. Preventive services are not subject to a deductible and are fully covered if received in-network subject to an annual maximum. Both retail and mail order prescription drug coverage are included. Retiree health, dental, and vision plan benefits have generally matched those in place for active employees.

#### NOTES TO BASIC FINANCIAL STATEMENTS

#### Personal Healthcare Fund

A Pension Plus member who became a member of the System on or after June 10, 2012 will be enrolled into a Personal Healthcare Fund (PHF), which is a separate account within the State of Michigan 401(k) and 457 Plan. The first optional 2% of their contributions plus their employer match are directed into the PHF. These members will also receive a credit into a health reimbursement account (HRA) at termination if they have at least 10 years of service at termination. The credit will be up to \$2,000 for participants.

#### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### **BASIS OF ACCOUNTING AND PRESENTATION**

The System's financial statements are prepared using the accrual basis of accounting. Contributions from the employers are recognized as revenue when due and payable. Benefits and refunds are recognized when due and payable in accordance with the terms of the System. The reserves are described below and details are provided in the supporting schedules.

Governmental Accounting Standards Board (GASB) Statement No. 67 and Statement No. 74, which were adopted during the year ended September 30, 2014 and 2017, addresses accounting and financial reporting requirements for pension and other postemployment benefit plans, respectively. The requirements for both GASB Statement No. 67 and 74 require changes in presentation of the financial statements, notes to the financial statements, and required supplementary information. Significant changes include an actuarial calculation of the total and net, pension and other postemployment benefit liabilities. It also includes comprehensive note disclosures regarding the pension and other postemployment benefit liability, the sensitivity of the net pension and other postemployment benefit liability to the discount rate, and increased investment activity disclosures. The implementation of GASB Statement No. 67 and 74 did not significantly impact the accounting for accounts receivable and investment balances. The total pension and other postemployment benefit liability, determined in accordance with GASB Statement No. 67 and 74, is presented in Note 4 on page 28, Note 5 on page 30, and in the Required Supplementary Information beginning on page 45.

As of September 30, 2016, the System applied GASB Statement No. 72, *Fair Value Measurement and Application*. GASB Statement No. 72 provides guidance for determining a fair value measurement for reporting purposes and applying fair value to certain investments and disclosures related to all fair value measurements.

#### **RESERVES**

Public Act 182 of 1986, as amended, created the Reserve for Employee Contributions, Reserve for Employer Contributions, Reserve for Retired Benefit Payments, Reserve for Undistributed Investment Income, and Reserve for Health (OPEB) Related Benefits. The financial transactions of the System are recorded in these reserves as required by Public Act 182 of 1986, as amended. The reserves are described below, and details are provided in the supporting schedules.

#### Reserve for Employee Contributions

Command Officers currently participate on a noncontributory basis. Effective October 1, 2012, troopers and sergeants hired before June 10, 2012 began contributing 1% of their compensation, and the contribution increased to 2%, effective October 1, 2013. This reserve represents active member contributions and interest less amounts transferred to the Reserve for Retired Benefit Payments for regular and disability retirement, amounts refunded to terminated members, and unclaimed amounts transferred to the income reserve. At September 30, 2021, the balance in this reserve was \$12.2 million.

#### Reserve for Pension Plus Employee Contributions

Troopers hired on or after June 10, 2012 contribute 4% of their compensation. This reserve represents active member contributions and interest less amounts transferred to the Pension Plus Reserve for Retired Benefit Payments for regular and disability retirement, amounts refunded to terminated members. At September 30, 2021, the balance in this reserve was \$14.8 million.

#### Notes to Basic Financial Statements

#### Reserve for Employer Contributions

Defined Benefit employer contributions are credited to this reserve. Interest from the Reserve for Undistributed Investment Income is credited annually. Amounts are transferred annually from this reserve to the Reserve for Retired Benefit Payments to fund that reserve. At September 30, 2021, the balance in this reserve was (\$142.5) million.

#### Reserve for Pension Plus Employer Contributions

Pension Plus employer contributions are credited to this reserve. Interest from the Reserve for Undistributed Investment Income is credited annually. Amounts are transferred annually from this reserve to the Pension Plus Reserve for Retired Benefit Payments to fund that reserve. At September 30, 2021, the balance in this reserve was \$34.7 million.

#### Reserve for Retired Benefit Payments

This represents the reserve for payment of future retirement benefits to current Defined Benefit retirees. At retirement, a member's accumulated contributions plus interest are transferred into this reserve from the Reserve for Employee Contributions. Monthly benefits, which are paid to the retirees, reduce this reserve. At the end of each fiscal year, an amount is transferred from the Reserve for Employer Contributions to bring the reserve into balance with the actuarial present value of retirement allowances. Also included are reserves for casualty experience (injury or death of a member, or vested former member). The initial actuarial casualty valuation determined the full funding reserve requirements to be allocated from assets of the reserve. All retiree casualty payments are made from this reserve. At September 30, 2021, the balance in this reserve was \$1.6 billion.

#### Reserve for Pension Plus Retired Benefit Payments

This represents the reserve for payment of future retirement benefits to current Pension Plus retirees. At retirement, a member's accumulated contributions plus interest are transferred into this reserve from the Reserve for Pension Plus Employee Contributions. Monthly benefits, which are paid to the retirees, reduce this reserve. At the end of each fiscal year, an amount is transferred from the Reserve for Pension Plus Employer Contributions to bring the reserve into balance with the actuarial present value of retirement allowances. Also included are reserves for casualty experience (injury or death of a member, or vested former member). All Pension Plus retiree casualty payments are made from this reserve. At September 30, 2021, the balance in this reserve was \$440.2 thousand.

#### Reserve for Undistributed Investment Income

The net investment earnings (losses) are recorded in this reserve. Interest as authorized by the board is transferred annually to the other reserves. Administrative expenses are paid from this reserve. At September 30, 2021, the balance of this reserve was \$304.1 million.

#### Reserve for Health (OPEB) Related Benefits

This reserve is credited with member and employer contributions for retirees' health (including prescription coverage), dental, and vision benefits. Starting in fiscal year 2012, the employer contribution is based on a prefunded basis and represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liability (or funding excess) over a period not to exceed thirty years. In addition, in fiscal year 2021, this reserve includes revenue from the federal government for the Employee Group Waiver Plan (EGWP). Premiums for health, dental and vision benefits are paid from this reserve. At September 30, 2021, the balance in this reserve was \$372.9 million.

#### **REPORTING ENTITY**

The System is a fiduciary component unit of the State of Michigan. As such, the System's financial statements are included as a pension trust fund in the State of Michigan Annual Comprehensive Financial Report. The System and its Board are not financially accountable for any other entities or other organizations. Accordingly, the System is the only entity included in this financial report.

#### **NOTES TO BASIC FINANCIAL STATEMENTS**

#### **BENEFIT PROTECTION**

Public Act 100 of 2002 was passed by the Michigan Legislature to protect pension benefits of public employees from alienation (being transferred). Alienation is attachment, garnishment, levy, execution, bankruptcy or other legal process except for divorce orders or eligible domestic relation orders. The statutes governing the System contained an "anti-alienation" clause to provide for this protection; however, many smaller public pension systems did not have the benefit of this protection. Therefore, Public Act 100 of 2002 was passed to establish legal protection of pension assets that encompasses all public employees.

#### **INVESTMENTS**

Generally, investments are reported at fair value, consistent with the provisions of GASB Statement No. 72, *Fair Value Measurement and Application*. Short-term, highly liquid debt instruments including commercial paper are reported at amortized cost. Additional disclosures describing investments are provided in Note 6.

#### **INVESTMENT INCOME**

Dividend and interest income are recognized on the accrual basis. Fair value changes are recorded as investment income or loss. Purchases and sales of investments are recorded as of the trade date (the date upon which the transaction is initiated), except for purchase and sale of mortgages, real estate, and alternative investments, which are recorded as of the settlement date (the date upon which the transaction is ultimately completed). The effect of recording such transactions as of the settlement date does not materially affect the financial statements.

#### **COSTS OF ADMINISTERING THE SYSTEM**

Each year a restricted general fund appropriation is requested to fund the on-going business operations of the System. These administrative costs are ultimately funded by the System through the regular transfer of funds from the System to the State's general fund based on either a direct cost or allocation basis depending on the nature of the expense. Costs of administering the System are financed by undistributed investment income of the System.

#### PROPERTY AND EQUIPMENT

Office space is leased from the State on a year to year basis. Office equipment is capitalized if the value exceeds \$5,000. These assets are recorded at cost and are reported net of depreciation in the *Statement of Pension Plan and Other Postemployment Benefit Plan Fiduciary Net Position*. Such assets are depreciated on a straight-line basis over 10 years. The System does not have equipment that falls within these parameters.

#### **RELATED PARTY TRANSACTIONS**

#### Leases and Services

The System leases operating space and purchases certain administrative, data processing, legal and investment services from the State. The space and services are not otherwise available by competitive bid. The following summarizes costs incurred by the System for such services.

		2021	
	(in thousands)		
Building Rentals	\$	12	
Technological Support		136	
Attorney General		58	
Investment Services		390	
Personnel Services		386	

#### Cash

At September 30, 2021, the System had \$15.3 million in a common cash investment pool maintained for various State operating funds. The participating funds in the common cash pool earn interest at various rates depending upon prevailing short-term interest rates. Earnings from these activities amounted to \$7,684 for the year ended September 30, 2021.

#### NOTES TO BASIC FINANCIAL STATEMENTS

#### **NOTE 3 – CONTRIBUTIONS**

The State is required by Public Act 182 of 1986, as amended to contribute amounts necessary to finance the coverage of member and retiree benefits. Command officers currently participate in the System on a noncontributory basis. Effective October 1, 2012, troopers and sergeants hired before June 10, 2012, began contributing 1% of their compensation, and the contribution increased to 2%, effective October 1, 2013. Troopers hired on or after June 10, 2012 contribute 4% of their compensation. Under certain circumstances, members may contribute to the System for the purchase of creditable service, such as military service or maternity leave. The State is required by Public Act 182 of 1986, as amended, to contribute amounts necessary to finance the benefits of its employee and retiree OPEB. Contribution provisions are specified by State statute and may be amended only by action of the State Legislature.

Employer contributions to the System are determined on an actuarial basis using the entry age normal actuarial cost method. Under this method, the actuarial present value of the projected benefits of each individual included in the actuarial valuation is allocated on a level basis over the service of the individual between entry age and assumed exit age. The normal cost is the annual cost assigned, under the actuarial funding method, to the current and subsequent plan years. The remainder is called the actuarial accrued liability. Normal cost is funded on a current basis.

Pension and OPEB contributions made in the fiscal year ending September 30, 2021, were determined as of the September 30, 2018 actuarial valuations. The pension and OPEB unfunded (overfunded) actuarial accrued liabilities (UAAL) as of September 30, 2018 are amortized over a 18 year period beginning October 1, 2020 and ending September 30, 2036. Public Act 674 of 2018 extended the amortization period for SPRS pension and OPEB plans to September 30, 2038. This change will first be reflected in contributions calculated for the fiscal year 2021. The schedules below summarize pension and OPEB contribution rates in effect for fiscal year 2021.

#### Pension Contribution Rates

Benefit Structure	Member	Employer	
Non Command Officers	2.00 %	59.97 %	
Command Officers	0.00	61.60	
Pension Plus	4.00	47.58	

#### **OPEB Contribution Rates**

Benefit Structure	Member	Employer	
Premium Subsidy	0.00 %	37.90 %	
Personal Healthcare Fund	0.00	38.36	

The System is required to reconcile with actuarial requirements annually. Any funding deficiency for pension and/or OPEB benefits is smoothed over five years. One fifth (20%) of the funding deficiency is included in each of the subsequent years' contribution, and is not recognized as a receivable in the accounting records.

#### NOTES TO BASIC FINANCIAL STATEMENTS

#### **NOTE 4 – NET PENSION LIABILITY**

#### MEASUREMENT OF THE NET PENSION LIABILITY

The net pension liability is to be measured as the total pension liability, less the amount of the pension plan's fiduciary net position. In actuarial terms, this will be the accrued liability less the fair value of assets (not the smoothed actuarial value of assets that is often encountered in actuarial valuations performed to determine the employer's contribution requirement).

#### Net Pension Liability

(in thousands)

Total Pension Liability Plan Fiduciary Net Position		2,427,301 1,842,516
Net Pension Liability	\$	584,785
Plan Fiduciary Net Position as a Percentage of Total Pension Liability		75.91%
Net Pension Liability as a Percentage of Covered Payroll		445.27%
Total Covered Payroll	\$	131,332

#### LONG-TERM EXPECTED RETURN ON PLAN ASSETS

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation as of September 30, 2021, are summarized in the following table:

#### **Asset Allocation**

	Target	Long-Term Expected
Asset Class	Allocation	Real Rate of Return*
Domestic Equity Pools	25.0 %	5.4 %
International Equity Pools	15.0	7.5
Private Equity Pools	16.0	9.1
Real Estate and Infrastructure Pools	10.0	5.4
Fixed Income Pools	10.5	(0.7)
Absolute Return Pools	9.0	2.6
Real Rate and Opportunistic Pools	12.5	6.1
Short-Term Investment Pools	2.0	(1.3)
TOTAL	<u>100.0</u> %	

<sup>\*</sup> Long-term rates of return are net of administrative expenses and 2.0% inflation.

#### **RATE OF RETURN**

For the fiscal year ended September 30, 2021, the annual money-weighted rate of return on pension plan investment, net of pension plan investment expense, was 27.25%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

#### NOTES TO BASIC FINANCIAL STATEMENTS

#### **DISCOUNT RATE**

The State of Michigan Retirement Board adopted a Dedicated Gains Policy to lower the discount rate in years where investment returns exceed the current assumption. A single discount rate of 6.80% was used to measure the total pension liability (6.85% for the Hybrid Plan) for fiscal year 2021. In fiscal year 2020, the single discount rate used to measure the total pension liability was 6.8% (6.85% for the Hybrid Plan). This single discount rate was based on the expected rate of return on pension plan investments of 6.80% (6.85% for the Hybrid Plan). The projection of cash flows used to determine this single discount rate was based on the assumption that in the future, plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

#### SENSITIVITY OF THE NET PENSION LIABILITY TO CHANGES IN THE DISCOUNT RATE

As required by GASB Statement No. 67, we determined the sensitivity of the net pension liability to changes in the single discount rate. The following table presents the plan's net pension liability, in thousands, calculated using a single discount rate of 6.80% (6.85% for the Hybrid plan), as well as what the plan's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower or 1-percentage-point higher:

Current Discount			
1% Decrease	Rate Assumption	1% Increase	
5.80% / 5.85%	6.80% / 6.85%	7.80% / 7.85%	
\$862,334	\$584,785	\$354,868	

#### TIMING OF THE VALUATION

An actuarial valuation to determine the total pension liability is required to be performed at least every two years. If the actuarial valuation is not calculated as of the plan's fiscal year end, the total pension liability is required to be rolled forward from the actuarial valuation date to the pension plan's fiscal year end.

The total pension liability as of September 30, 2021, is based on the results of an actuarial valuation date of September 30, 2020, and rolled-forward using generally accepted actuarial procedures.

#### **ACTUARIAL VALUATIONS AND ASSUMPTIONS**

Actuarial valuations for the pension plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment and mortality. Amounts determined regarding the funded status of the plan and the actuarially determined contributions (ADC) are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

The Schedules of Contributions in Required Supplementary Information present trend information about the amounts contributed to the plan by employers in comparison to the ADC, an amount that is actuarially determined in accordance with the parameters of GASB Statement No. 67 for pension.

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

#### **NOTES TO BASIC FINANCIAL STATEMENTS**

The information presented in the Net Pension Liability schedules and notes was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest actuarial valuation follows:

#### Summary of Actuarial Assumptions

Notes Assumption changes as a result of an experience study for the period

2012 through 2017 have been adopted by the System for use in the determination of the total pension liability beginning with the September 30, 2018 Annual Comprehensive Financial Report.

#### NOTE 5 - NET OPEB LIABILITY

#### MEASUREMENT OF THE NET OPEB LIABILITY

The net OPEB liability is to be measured as the total OPEB liability, less the amount of the OPEB plan's fiduciary net position. In actuarial terms, this will be the accrued liability less the fair value of assets (not the smoothed actuarial value of assets that is often encountered in actuarial valuations performed to determine the employer's contribution requirement).

#### **Net OPEB Liability**

(in thousands)

Total OPEB Liability	\$ 749,776
Plan Fiduciary Net Position	 372,901
Net OPEB Liability	\$ 376,875
Plan Fiduciary Net Position as a Percentage of Total OPEB Liability	49.73%
Net OPEB Liability as a Percentage of Covered Payroll	286.96%
Total Covered Payroll	\$ 131,332

<sup>&</sup>lt;sup>1</sup> Applies to individuals hired before June 10, 2012.

## NOTES TO BASIC FINANCIAL STATEMENTS

#### LONG-TERM EXPECTED RETURN ON PLAN ASSETS

The long-term expected rate of return on OPEB plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of OPEB plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the longterm expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the OPEB plan's target asset allocation as of September 30, 2021, are summarized in the following table:

#### Asset Allocation

	Target	Long-Term Expected
Asset Class	Allocation	Real Rate of Return*
Domestic Equity Pools	25.0 %	5.4 %
International Equity Pools	15.0	7.5
Private Equity Pools	16.0	9.1
Real Estate and Infrastructure Pools	10.0	5.4
Fixed Income Pools	10.5	(0.7)
Absolute Return Pools	9.0	2.6
Real Rate and Opportunistic Pools	12.5	6.1
Short-Term Investment Pools	2.0	(1.3)
TOTAL	<u>100.0</u> %	

<sup>\*</sup> Long-term rates of return are net of administrative expenses and 2.0% inflation.

#### **RATE OF RETURN**

For the fiscal year ended September 30, 2021, the annual money-weighted rate of return on OPEB plan investment, net of OPEB plan investment expense, was 26.10%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

#### **DISCOUNT RATE**

The State of Michigan Retirement Board adopted a Dedicated Gains Policy to lower the discount rate in years where investment returns exceed the current assumption. A single discount rate of 6.90% was used to measure the total OPEB liability for fiscal year 2021. In fiscal year 2020, the single discount rate used to measure the total OPEB liability was 6.90%. This single discount rate was based on the expected rate of return on OPEB plan investments of 6.90%. The projection of cash flows used to determine this single discount rate was based upon the assumption that in the future plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the OPEB plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on OPEB plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability.

## **NOTES TO BASIC FINANCIAL STATEMENTS**

#### SENSITIVITY OF THE NET OPEB LIABILITY TO CHANGES IN THE DISCOUNT RATE

As required by GASB Statement No. 74, we have determined the sensitivity of the net OPEB liability to changes in the single discount rate. The following table presents the plan's net OPEB liability, in thousands, calculated using a single discount rate of 6.90%, as well as what the plan's net OPEB liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher:

Current Single Discount					
1% Decrease	Rate Assumption	1% Increase			
5.90%	6.90%	7.90%			
\$463,384	\$376,875	\$304,662			

## SENSITIVITY OF THE NET OPEB LIABILITY TO HEALTHCARE COST TREND RATE

As required by GASB Statement No. 74, we have determined the sensitivity of the net OPEB liability to changes in the healthcare cost trend rates. The following table presents the plan's net OPEB liability, in thousands, calculated using assumed trend rates, as well as what the plan's net OPEB liability would be if it were calculated using a trend rate that is 1-percentage-point lower or 1-percentage-point higher:

Current Healthcare					
1% Decrease	Cost Trend Rate Assumption	1% Increase			
\$301,026	\$376,875	\$465,330			

#### TIMING OF THE VALUATION

An actuarial valuation to determine the total OPEB liability is required to be performed at least every two years. If the actuarial valuation is not calculated as of the plan's fiscal year end, the total OPEB liability is required to be rolled forward from the actuarial valuation date to the OPEB plan's fiscal year end.

The total OPEB liability as of September 30, 2021, is based on the results of an actuarial valuation date of September 30, 2020, and rolled-forward using generally accepted actuarial procedures.

## **ACTUARIAL VALUATIONS AND ASSUMPTIONS**

Actuarial valuations for the OPEB plans involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the actuarially determined contributions (ADC) are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

The Schedules of Contributions in Required Supplementary Information present trend information about the amounts contributed to the plan by employers in comparison to the ADC, an amount that is actuarially determined in accordance with the parameters of GASB Statement No. 74 for OPEB.

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

## NOTES TO BASIC FINANCIAL STATEMENTS

The information presented in the Net OPEB Liability schedules and notes was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest actuarial valuation follows:

### Summary of Actuarial Assumptions

Valuation Date September 30, 2020 Entry Age, Normal Actuarial Cost Method

Asset Valuation Method Fair Value

**Actuarial Assumptions:** 

Wage Inflation Rate 2.75%

Investment Rate of Return 6.90%, net of investment expenses

Projected Salary Increases 3.27% - 87.75%, including wage inflation at 2.75% Healthcare Cost Trend Rate<sup>2</sup> 7.50% Year 1 graded to 3.5% Year 15; 3.0% Year 120

Mortality

Retirees RP-2014 Male and Female Healthy Annuitant Mortality Table scaled

by 93% for males and 99% for females and adjusted for mortality

improvements using projection scale MP-2017 from 2006. Active RP-2014 Male and Female Employee Mortality Table scaled by

100% for males and 100% for females and and adjusted for mortality

improvements using projection scale MP-2017 from 2006.

**Disabled Retirees** RP-2014 Male and Female Disabled Annuitant Mortality Table

scaled by 100% for males and 100% for females and adjusted for mortality improvements using projection scale MP-2017 from 2006.

Other Assumptions OPEB only:1

Opt Out Assumption 6% of eligible participants are assumed to opt out of the retiree health

plan.

Survivor Coverage 100% of male retirees and 100% of female retirees are assumed to

have coverage continuing after the retiree's death when 2-person

coverage was assumed to be elected.

85% of male and 70% of female future retirees are assumed to elect Coverage Election at Retirement

coverage for 1 or more dependents.

Notes:

Assumption changes as a result of an experience study for the period 2012 through 2017 have been adopted by the System for use in the

determination of the total OPEB liability beginning with the September 30, 2018 Annual Comprehensive Financial Report.

<sup>&</sup>lt;sup>1</sup> Applies to individuals hired before June 10, 2012.

<sup>&</sup>lt;sup>2</sup> Applies to medical and Rx payments.

## NOTES TO BASIC FINANCIAL STATEMENTS

## **NOTE 6 - INVESTMENTS**

#### **INVESTMENT AUTHORITY**

The State of Michigan Investment Board (Board) was created by Executive Order 2018-10 (Order) and serves as the investment fiduciary over the assets of the State sponsored defined benefit retirement systems. The Board is responsible for investing the System's assets in accordance with the duties and powers enumerated in the Order and with Public Act 380 of 1965, as amended. Investments are made subject to the Public Employee Retirement System Investment Act, Public Act 314 of 1965, as amended. The Public Employee Retirement System Investment Act authorizes, with certain restrictions, the investment of pension fund assets in stocks, corporate and government bonds and notes, mortgages, real estate, and certain short-term and private equity investments. Investments must be made for the exclusive purposes of providing benefits to active members, retired members and beneficiaries, and for defraying the expenses of investing the assets.

#### **DERIVATIVES INSTRUMENTS**

The Board employs the use of derivative instrument in the investment of the pension (and other employee benefit) trust funds (the trust funds).

Derivative instruments are used in managing the trust fund portfolios but uses do not include speculation or leverage of investments. State investment statutes limit total derivative instrument exposure to 15% of a fund's total asset value and restrict uses to replication of returns and hedging of assets. Swap agreements represent the largest category of derivative instrument investments subject to this limitation. Option and Future contracts traded daily on an exchange and settling in cash daily or having a limited and fully defined risk profile at an identified, fixed cost are not subject to the derivative instrument exposure limitation. Less than 15% of the total trust funds' portfolio has been invested from time to time in future contracts, swap agreements, structured notes, options and forward contracts.

The derivative instrument fair values are reported on the Statement of Pension Plan and Other Postemployment Benefit Plan Fiduciary Net Position as of September 30, 2021, in their respective investment pool's fair value. Derivative instrument net increase and decrease are reported on the Statement of Changes in Pension Plan and Other Postemployment Benefit Plan Fiduciary Net Position for fiscal year ended September 30, 2021, under "Investment income (loss)", in "Net increase (decrease) in fair value of investments". Bond interest, swap payments, and dividends are reported under "Investment income (loss)", in "Interest, dividends, and other".

Derivative instrument Investment Table as of September 30, 2021 (in thousands):

Investment and Investment Type	Percentage of Fair Value	Notional Value	Investments at Fair Value	Net Increase (Decrease) in Fair Value	Investment Income	Fair Value Subject to Credit Risk
Future Contracts Fixed Income and International Equity Investments	0.0%	(\$14,789.5)	(\$9.7)	\$675.6	\$0.0	\$0.0
Option Contracts Equity, Fixed Income and International Equity Investments	0.3%	708,483.1	7,374.9	8,557.5	0.0	0.0
Swap Agreements Fixed Income and International Equity Investments	2.5%	93,007.9	56,266.3	28,262.8	(61.6)	7,465.0
Total	_	\$786,701.5	\$63,631.5	\$37,496.0	(\$61.6)	\$7,465.0

To diversify the trust funds' portfolio, the Board has entered into international swap agreements with investment grade counterparties, which are tied to stock market indices in approximately forty-six foreign countries. Generally,

## **NOTES TO BASIC FINANCIAL STATEMENTS**

the notional amount of equity swaps tied to foreign stock market indices is executed via a net total return USD index. The swap agreements provide that the System will pay quarterly over the term of the swap agreements, interest indexed to the three month London Inter-Bank Offer Rate (LIBOR) or the U.S. Federal Funds Rate, adjusted for an interest rate spread, on the notional amount stated in the agreements. International equity swap agreement maturity dates range from October 2021 to October 2022. U.S. Treasury Bonds, U.S. Corporate Bonds and other public market fixed income securities, as well as other investments are held to correspond with the notional amount of the international swap agreements. The value of the international synthetic equity structures is a combination of the value of the swap agreements and the value of the notes and other investments. The book value represents the cost of the bonds, notes, and other investments. The current value represents the current value of the bonds, notes, and other investments and the change in the value of the underlying indices from the inception of the swap agreements. The current value is used as a representation of the fair value based on the intention to hold all swap agreements until maturity. At the maturity of the swap agreements, the trust funds will either receive the increase in the value of the equity indices from the level at the inception of the agreements or pay the decrease in the value of the indices. The combined swap structure generally realizes gains and losses on a rolling basis.

To reduce the risk in the Fixed Income and International Equity portfolios, the Board has entered into FX swap agreements, interest rate swap agreements and credit default swap agreements with investment grade counterparties. The FX swap agreements are tied to foreign currency forward exchange rates and are used to reduce the currency risk within the fixed income portfolio. The swap agreements are entered into on an as-needed basis and are generally tied to the maturity of a foreign government bond indenture denominated in a foreign currency. The purpose of the FX swap agreement that has a final maturity date of less than three months, is to reduce or eliminate the currency risk on foreign bond transactions. U.S. Domestic LIBOR-based floating rate notes, U.S. Treasury securities, and portfolio cash are held to correspond with the notional amount of FX swap agreements within the Fixed Income and International Equity Portfolios. Interest rate swaps are used to adjust interest rate and yield curve exposures and substitute for physical securities. Long swap positions that received fixed rate increase exposure to long-term interest rates; short swap positions that pay fixed rated, decrease exposure. Credit default swaps (CDS) are used to manage credit exposure without buying or selling securities outright. Written CDS increase credit exposure, selling protection, obligating the portfolio to buy bonds from counterparties in the event of a default. Purchased CDS decrease exposure, buying protection, providing the right to "Put" bonds to the counterparty in the event of a default.

Counterparty credit risk is the maximum loss amount that would be incurred if the counterparties to the derivative instrument failed to perform according to the terms of the contract, without respect to any collateral or other security, or netting arrangement. For the Over-the-Counter (OTC) derivative instrument investments, the system held collateral of \$1,132.3 thousand in cash deposits and \$2,675.1 thousand in securities on behalf of counterparties.

The Board traded bond future contracts to manage duration, yield curve exposure, adjust interest rate exposures and replicate bond positions.

To enhance returns while limiting downside risk, the Board traded equity options in single securities and on indices in the Large Cap Core and All Cap GARP funds. Attractively priced equity options were used for the purpose of stock replacement in order to drive excess returns over the S&P 500, as well as to provide added exposure to strong equity markets while limiting principal at risk. Put options are used to protect against large negative moves in the market indices. Options traded by the Board in the Fixed Income and International Equity pools are used to manage interest rate and volatility exposures. Written options generate income in expected interest rate scenarios and may generate capital losses, if unexpected interest rate environments are realized. Both written and purchased options will become worthless at expiration if the underlying instrument does not reach the strike price of the option. However, purchased options are often sold well before expiration in order to lock in profits at prices well below listed strike prices, and thereby generate consistent returns.

## **SECURITIES LENDING**

The System, pursuant to a Securities Lending Authorization Agreement, has authorized State Street Bank and Trust Company ("State Street") to act as System's agent in lending System's securities to approved borrowers. State Street, as agent, enters into Securities Loan Agreements with borrowers.

During the fiscal year, State Street lent, on behalf of the Board, certain securities of the System held by State Street as custodian and received cash or other collateral including securities issued or guaranteed by the United States

## NOTES TO BASIC FINANCIAL STATEMENTS

government. The types of securities lent were equity, and fixed income, which includes government and corporate bonds and notes. State Street does not have the ability to pledge or sell collateral securities delivered absent a borrower default. Borrowers were required to deliver collateral for each loan equal to at least 100% of the fair value of the loaned securities.

Pursuant to the Securities Lending Authorization Agreement, State Street had an obligation to indemnify the System in the event of default by a borrower. There were no failures by any borrowers to return loaned securities or pay distributions thereon during the fiscal year that resulted in a declaration or notice of default of the Borrower.

During the fiscal year, the System and the borrowers maintained the right to terminate securities lending transactions upon notice. The cash collateral received on each loan was invested, together with the cash collateral of other qualified tax-exempt plan lenders, in a collective investment pool. As of September 30, 2021, such investment pool had an average duration of 4 days and an average weighted final maturity of 84 days for USD. Because the loans were terminable at will their duration did not generally match the duration of the investments made with cash collateral. On September 30, 2021 the System had no credit risk exposure to borrowers. The fair value of collateral held and the fair value (USD) of securities on loan for the System as of September 30, 2021 was \$71.8 million and \$69.8 million respectively.

#### **RISK**

In accordance with GASB Statement No. 40, investments require certain disclosures regarding policies and practices and the risks associated with them. The credit risk, (including custodial credit risk and concentration of credit risk), the interest rate risk, and foreign currency risk are discussed in the following paragraphs. Amounts represent the pro rata share of the underlying investments as required by GASB Statement No. 40. These investments are held in internal investment pools and reported as such in the financial statements.

#### Credit Risk

Credit risk is the risk that an issuer will not fulfill its obligations.

- Short-Term Fixed Income Investments Eligible commercial paper investments must be rated within one
  of the two highest ratings classifications ("1" or "2") at the time of purchase from one of the nationally
  recognized ratings organizations (NRSROs) specified in Public Act 314 of 1965, as amended. Borrowers
  must have at least \$400.0 million in commercial paper outstanding, and the Board may not invest in more
  than 10% of the borrower's outstanding debt.
- Long-Term Fixed Income Investments Investment grade and noninvestment grade securities may be acquired in compliance with the parameters set forth in Public Act 314 of 1965, as amended, and the Board's Investment Policy Statement for the System. Public Act 314 defines investment grade as investments in the top four major grades, rated by one of the NRSROs. At September 30, 2021, the System was in compliance with Public Act 314 and the Investment Policy Statement in all material aspects.

NR - Not Rated

#### **Custodial Credit Risk**

Custodial credit risk for investments is the risk that, in the event of a failure of the counterparty, the State will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party.

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government and are held by either the counterparty or the counterparty's trust department or agent, but not in the government name.

The Board does not have a policy for custodial credit risk. However, the State's custodial bank had a credit rating of A at September 30, 2021. As of September 30, 2021, no securities were exposed to custodial credit risk.

## **NOTES TO BASIC FINANCIAL STATEMENTS**

#### Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer.

Other than obligations issued, assumed or guaranteed by the United States, its agencies or United States government sponsored enterprises, the System is prohibited by Public Act 314 of 1965, as amended, from investing more than 5% of the outstanding obligations of any one issuer or investing more than 5% of a System's assets in the obligations of any one issuer. When calculating the amount of outstanding obligations, the System includes publicly issued and privately held debt.

At September 30, 2021, there were no investments in any single issuer that accounted for more than 5% of the System's assets. The System held two investment that exceeded the 5% cap in obligations of any one issuer. The System is aware of the breach and in accordance with MCL 38.1133(3)(g), is developing a prudent plan for reallocating assets to comply with the prescribed limitations.

#### Interest Rate Risk - Fixed Income Investments

Interest rate risk is the risk that changes in interest rates of debt investments will adversely affect the fair value of an investment.

The Board's policy states that cash equivalents are invested in short-term fixed income securities with an average weighted maturity of less than one year to provide liquidity and safety of principal from capital market and default risk. At September 30, 2021, the fair value of the System's short term investments was \$99.6 million with the weighted average maturity of 125 days.

The Board does not have a policy regarding interest rate risk for long-term debt investments. However, the trust funds are invested with a long-term strategy. The goal is to balance higher returns while accepting minimum risk for the return. Analyzing the yield curve on individual securities as compared to U.S. Treasuries determines, in part, what is an acceptable risk for the return. Therefore, market conditions such as lower interest rates result in shorter duration and higher interest rates result in longer duration.

#### **Debt Securities**

(in thousands) As of September 30, 2021

	Fa	air Value	Effective Duration in Years
Government			
U. S. Treasury	\$	76,879	7.1
U. S. Agencies - Backed		7,873	3.9
U. S. Agencies - Sponsored		14,369	3.7

International*			
U. S. Treasury		29,254	2.0
Corporate		575	0.01
Total	\$	266,871	

Debt securities are exclusive of securities lending collateral.

<sup>\*</sup> International contains Domestic Government and Corporate Debt Securities as a part of their derivative instrument strategies. The interest rates reset on a quarterly basis for these securities.

## **NOTES TO BASIC FINANCIAL STATEMENTS**

## Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or deposit.

The System invests in various securities denominated in foreign currencies. Authorized global securities include equities, fixed income, mutual funds, real estate, and limited partnerships. These investments are limited to 30% of the total assets of the System with additional limits of not more than 5% of the outstanding global securities of any one issuer and no more than 5% of the System's assets in the global securities of any one issuer. In addition to these limits, the Board cannot acquire securities with companies that have active business operations in the state sponsors of terror as identified by the United States Secretary of State. At September 30, 2021, the total amount of foreign investment subject to foreign currency risk was \$268.5 million, which amounted to 12.2% of total investments (exclusive of securities lending collateral) of the System.

## NOTES TO BASIC FINANCIAL STATEMENTS

#### **FAIR VALUE MEASUREMENTS**

The Retirement System categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Not all investments held by the Retirement System are recorded at fair value. GASB 72 allows for certain investments to be recorded at cost (or amortized cost or any other valuation method), and therefore, they are not presented in the fair value hierarchy table. Equity and Fixed Income securities classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets for those securities. Equity Swaps and Fixed Income securities classified in Level 2 of the fair value hierarchy are valued using a matrix pricing technique and other significant observable inputs. Equity and Fixed Income securities classified as Level 3 of the fair value hierarchy are valued using third party data and reports that are unobservable. Securities reported at Net Asset Value (NAV) are valued using the most recent third party statement adjusted for cash flows as of September 30, 2021. Investments that are measured at fair value using the Net Asset Value per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy on the following page.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Retirement System's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset or liability.

## **NOTES TO BASIC FINANCIAL STATEMENTS**

Additional disclosures for fair value measurements of investments in certain entities that calculate the Net Asset Value per Share (or its equivalent):

### Private Equity Funds (in thousands)

Total investments measured	at the NAV	\$ 502,656
Unfunded commitments		183,426

These types of investment includes investments in approximately 313 partnerships that invest in leveraged buyouts, venture capital, mezzanine debt, distressed debt, secondary funds and other investments. These types of investments can never be redeemed with the funds, but distributions are received through the liquidation of the underlying assets of the fund. It's expected that the underlying assets of the fund are liquidated over a period of five to eight years. However, as of September 30, 2021, it is probable that all of the investments in this group will be sold at an amount different from the NAV per share (or its equivalent). Therefore, the fair values of the investments in this type have been determined using recent observable transaction information for similar investments and nonbinding bids received from potential buyers of the investments. As of September 30, 2021, a buyer for these investments has not been identified.

## Real Estate and Infrastructure (in thousands)

Total investments measured at the NAV	\$ 150,666
Unfunded commitments	47,572

Real Estate and Infrastructure funds include approximately 107 accounts (limited partnerships, limited liability companies, etc.) that invest in real estate or infrastructure related assets. The fair value of the Real Estate and Infrastructure funds have been determined in accordance with generally accepted accounting principles using the NAV per share (or its equivalent) of the Plan's ownership interest in partners' capital. These types of investments cannot be redeemed with the funds. Distributions from these funds will be received as the underlying investments are sold and liquidated over time. It is expected that the underlying assets will be sold over the next 5 – 15 years. However, buyers have not been determined so the fair value has been determined using the NAV per share (or its equivalent) of the Plan's ownership interest in partners' capital.

#### Absolute Return Portfolio (in thousands)

Total investments measured at the NAV	\$ 115,512
Unfunded commitments	16,916

This type includes approximately 14 investments that invest in hedge funds and hedge fund of funds that pursue multiple strategies to diversify risks and reduce volatility. The fair values of the investments in this type have been determined using the NAV per share (or its equivalent) of the investments. For 45.8% of the invested capital, investors may redeem at various dates between October 1, 2021 and April 1, 2022; 17.1% of the investments are redeemable between April 1, 2022 and October 1, 2022; 26.2% of the investments are redeemable between October 1, 2022 and October 1, 2032, and the remaining 10.9% is not redeemable on demand.

## Real Return and Opportunistic Portfolio (in thousands)

Total investments measured at the NAV	\$ 260,470
Unfunded commitments	89,903

## NOTES TO BASIC FINANCIAL STATEMENTS

This type includes approximately 95 funds that invest in private credit, tangible and intangible real assets, or other real return and opportunistic strategies. The fair values of the investments in this type have been determined using the NAV per share (or its equivalent) of the Plan's ownership interest in partners' capital. These investments can never be redeemed with the funds. Distributions from each fund will be received as the underlying investments of the funds are liquidated. It is expected that the underlying assets of the funds will be liquidated over the next 5 to 10 years.

### All Other Investments (in thousands)

Total investments measured at the NAV \$ 48,516 Unfunded commitments 15,916

The balance of plan assets reported at fair value include 15 investments:

- LPs that invest in fixed income investments such as: residential rehabilitation, middle market business loans and senior secured debt financing. These investments cannot be redeemed by limited partners. Distributions are received through the liquidation of the underlying assets of the fund.
- LPs that invest in fixed income type investments permitting partners to request redemption monthly or quarterly, after initial lock up period of 1 year or less, requiring 45 to 65 days' advance notice.
- LPs investing in global investments permitting partners to request partial redemptions quarterly or monthly, with advanced notice, subject to the sole discretion of the general partner.
- LPs that invest in private equity, private credit/loans, and tangible real assets that cannot be redeemed by limited partners. Distributions from each fund will be received as the underlying investments of the funds are liquidated.

## NOTE 7 - COMMITMENTS AND CONTINGENCIES

Under the Administrative Procedures Act, members may appeal a decision made by the Retirement Board. Once the administrative procedure has been exhausted, the decision may be appealed in Michigan's court system. Various cases that have exhausted the administrative procedures have been appealed in the court system. These cases are in the normal course of business and the System does not anticipate any material loss as a result of the contingent liabilities.

#### NOTE 8 – ACCOUNTING CHANGES AND RESTATEMENTS

Beginning net position for the Pension and OPEB plans were increased by \$11.2 million and \$8.4 million, respectively, to account for additional employer contributions due to the System. Accrued revenues due and payable to the system for employer contributions are recognized in accordance with GASB Statement No. 67, *Financial Reporting for Pension Plans*" and GASB Statement No. 74, *Financial Reporting for Other Postemployment Benefit Plan*.

For fiscal year 2021, the System adopted GASB Statement No. 84, *Fiduciary Activities*. The objective of this statement is to improve guidance regarding the identification of fiduciary activities for accounting and financial reporting purposes and how those activities should be reported. This Statement also establishes criteria for identifying fiduciary activities of all state and local governments. As a fiduciary component unit of the State, the System will be reported in the pension and other employee benefit trust fund financial statements of the State of Michigan Annual Comprehensive Financial Report.

#### **NOTE 9 – SUBSEQUENT EVENTS**

## **DISCOUNT RATE-DEDICATED GAINS POLICY**

In 2017, the Department of Technology, Management and Budget Director and the Michigan State Police Retirement Board adopted a dedicated gains policy to lower the discount rate in years where investment returns exceed the current assumption based on a schedule determined by the plan actuary. In October 2021, the DTMB Director and the Board modified the dedicated gains policy to limit the reduction in the discount rate to no lower than 6%. This change will impact the fiscal year 2021 pension and OPEB valuations and the calculated total pension and OPEB liabilities, however, the dollar value of this impact cannot be determined at this time.

#### NOTE TO REQUIRED SUPPLEMENTARY INFORMATION

## NOTE A - DESCRIPTION

Ten year historical trend information designed to provide information about the System's progress made in accumulating sufficient assets to pay benefits when due is presented in the preceding schedules. Other ten year historical trend information related to the System is presented in the Statistical and Actuarial Sections of the report. This information is presented to enable the reader to assess the progress made by the System in accumulating sufficient assets to pay pension and other postemployment benefits as they become due.

The comparability of trend information is affected by changes in actuarial assumptions, benefit provisions, actuarial funding methods, accounting policies, and other changes. Those changes usually affect trends in contribution requirements and in ratios that use the pension and other postemployment benefit obligations as a factor.

The Schedules of Contributions are presented to show the responsibility of the Employer in meeting the actuarial requirements to maintain the System on a sound financial basis.

The Schedules of Changes in Net Pension Liability and OPEB Liability, Schedules of Contributions, and Schedules of Investment Returns are schedules that are required in implementing GASB Statement No. 67 for pension and No. 74 for OPEB. These schedules are required to show information for ten years; additional years will be displayed as they become available. The schedules of Changes in the Net Pension and Net OPEB Liabilities represent, in actuarial terms, the accrued liability less the fair value of assets. The Schedule of Contributions is a comparison of the employer's contributions to the actuarially determined contributions. The Schedule of Investment Returns represents a money-weighted rate of return that expresses investment performance, net of pension and OPEB plan investment expense, adjusted for the changing amounts actually invested.

The actuarially determined contributions presented in the Schedule of Contributions for pension and OPEB are calculated as of September 30, three years prior to the end of the fiscal year in which contributions are reported. The following actuarial methods and assumptions were used to determine the fiscal year 2021 contributions reported in that schedule

## NOTE TO REQUIRED SUPPLEMENTARY INFORMATION

## Methods and Assumptions Used to Determine Contributions for Fiscal Year 2021:

Pension and OPEB

Valuation Date September 30, 2018 Actuarial Cost Method Entry Age, Normal

Amortization Method Level percent of payroll, closed period

Remaining Amortization Period 18 Years as of October 1, 2020, ending September 30, 2038

Price Inflation 2.25%

Projected Salary Increases 3.27% - 87.75%, including wage inflation at 2.75%

Retirement Age Experience-based table of rates that are specific to the type of eligibility

conditions.

Mortality

Retirees RP-2014 Male and Female Healthy Annuitant Mortality Tables scaled by

93% for males and 99% for females and adjusted for mortality

improvements using projection scale MP-2017 from 2006

Active RP-2014 Male and Female Employee Mortality Tables scaled by 100%

for males and 100% for females and adjusted for mortality improvements

using projection scale MP-2017 from 2006

Disabled Retirees RP-2014 Male and Female Disabled Annuitant Mortality Tables scaled

by 100% for males and 100% for females and adjusted for mortality

improvements using projection scale MP-2017 form 2006

Pension

Asset Valuation Method 5 year smoothed fair value

Investment Rate of Return 6.80% (6.85% for Hybrid Plan), net of investment

**OPEB** 

Asset Valuation Method 5 year smoothed Fair value Investment Rate of Return 6.90%, net of investment

Health Care Trend Rates 8.25% trend, gradually decrease

Aging Factors

Notes

6.90%, net of investment 8.25% trend, gradually decreasing to 3.50% in year 10.

Based on the 2013 SOA "Health Care Costs – From Birth to Death"

Some of the assumptions used to develop the 2021 Total Pension Liability (TPL) and the 2021 Total OPEB Liability (TOL) are different than the assumptions shown above. The assumptions used to develop the TPL are described in Note 4 (page 28) of this report and the assumptions used to

develop the TOL are described in Note 5 (page 30) of this report.

## REPORT ON INVESTMENT ACTIVITY

#### INTRODUCTION

The State of Michigan Investment Board (Board) was created by Executive Order 2018-10 (Order) and serves as the investment fiduciary over the assets of the State sponsored defined benefit retirement systems (Systems). The Board is responsible for investing the Systems' assets in accordance with the duties and powers enumerated in the Order and State law. Pursuant to powers provided in the Order, the Board duly authorized and delegated duties to the Department of Treasury's Bureau of Investments (BOI) to invest, prudently manage, and oversee the assets of the Systems and to take certain other actions that support the BOI's mandate in this regard. In furtherance of these duties, the BOI delivers quarterly investment activity reports to the Board that detail the investments, goals, and objectives of the Systems.

The Board is comprised of five members: three (3) public members appointed by the Governor and two (2) exofficio members. The public members serve four (4) year terms and are limited to two (2) such terms. The State Treasurer, as the chair of the Board, and the State Budget Director are the ex-officio members. As of September 30, 2021, members of the Board were as follows: Rachael Eubanks (chair, ex-officio member), Chris Harkins (exofficio member), James B. Nicholson (public member), Reginald G. Sanders, CFA, CAIA (public member), and Dina L. Richard, CPA (public member). The public members serve without pay but may receive reasonable reimbursement for actual and necessary travel and other expenses to attend official Board meetings.

### **INVESTMENT POLICY & GOALS**

The Board's Investment Policy Statement states that it and the BOI will operate in accordance with Public Employee Retirement System Investment Act (Act No. 314 of 1965) and within standard investment practices of the prudent person. This includes being authorized to invest in government obligations, corporate obligations, various short-term obligations, corporate (domestic and international) stocks, private equity interests, mutual funds, real estate interests, and other investments subject to specific parameters. Above all, Systems' assets are to be invested in a fiduciary capacity for the sole and exclusive benefit of the members of the Systems.

The Systems' Proxy Voting Policy sets forth directives on various issues as holders of publicly traded securities, including but not limited to: Boards of Directors, corporate governance, social issues, and various corporate actions. All proxies are reviewed and voted in accordance with the Systems' policy.

The primary function of the Systems is to provide retirement, survivor and disability benefits along with health and other postemployment benefits to its members. The Board is investment fiduciary and custodian of the Systems' investments pursuant to the Order and other State law. The goals of the Systems are:

- Maintain sufficient liquidity to pay benefits
- Meet or exceed the actuarial assumption over the long term
- Perform in the top half of the public plan universe over the long term
- Diversify assets to preserve capital and avoid large losses
- Exceed individual asset class benchmarks over the long term

The strategy for achieving these goals is supported by investing the assets of the Systems according to a five year asset allocation model. The Systems currently invest in eight different asset classes, which provides for a well-diversified portfolio.

## REPORT ON INVESTMENT ACTIVITY

#### **ASSET ALLOCATION**

(Excludes Collateral on Loaned Securities)

	As of 9/30/21	Five-Year
Investment Category	Actual %	Target %
Domestic Equity Pools	23.0 %	25.0 %
International Equity Pools	16.2	15.0
Private Equity Pools	23.3	16.0
Real Estate and Infrastructure Pools	7.0	10.0
Fixed Income Pools	10.1	10.5
Absolute Return Pools	5.3	9.0
Real Return and Opportunistic Pools	12.1	12.5
Short-Term Investment Pools	3.0	2.0
TOTAL	100.0 %	100.0 %

#### **INVESTMENT AUTHORITY**

Pursuant to State law (Executive Order 2018-10, which in part transferred to the Board the powers enumerated in (i) Section 91 of Act No. 380 of the Public Acts of 1965, as amended, and (ii) Section 12c of Act No. 314 of 1965), the Board is the investment fiduciary for the Systems, which is comprised of the State sponsored defined benefit retirement systems: Michigan Public School Employees' Retirement System, State Employees' Retirement System, Michigan State Police Retirement System, Michigan Judges' Retirement System, and the Michigan Military Retirement Provisions. The State Treasurer, State of Michigan, is custodian and ex officio treasurer of the retirement system for the Legislators, State of Michigan (Section 47 of Act no. 261 of the Public Acts of 1957, as amended).

Act No. 314 of the Public Acts of 1965, as amended, authorizes the investment of assets of public employee retirement systems or plans created and established by the State or any political subdivision.

## **INVESTMENT RESULTS**

#### **TOTAL PORTFOLIO RESULTS**

For the fiscal year ended September 30, 2021, the total System's rate of return was 27.2% for the Pension Plan and 26.9% for the OPEB Plan as compiled by State Street Investment Analytics. Annualized rates of return for the Pension Plan for the three, five, and ten year periods ending September 30, 2021 were: 11.9%, 12.0%, and 10.9% respectively.

Investment return calculations are prepared using a Time-Weighted rate of return.

#### **DOMESTIC EQUITY POOLS**

The objective for investments made in domestic equities is to meet or exceed the total return of the S&P Composite 1500 for one, three, and five-year periods and a market cycle.

For active management strategies, the objective is to earn returns that exceed the most relevant S&P Index, adjusting for market capitalization and style, for one, three, and five-year periods and a market cycle. Another objective is to rank above median in a universe of managers possessing a similar market cap and style characteristics.

## REPORT ON INVESTMENT ACTIVITY

The pools are invested primarily in equities or equity-related securities of U.S. companies through internal and externally managed strategies. The goal is to build a portfolio of strategies that will provide excess returns relative to the S&P Composite 1500 while providing a prudent measure of tracking error to the index. At times a portion of these pools may be invested in exchange traded funds (ETFs) and fixed-income short-term securities with maturities of less than one year.

The pools invest in equities and equity related securities that are listed on U.S. national securities exchanges, including American Depository Receipts (ADRs). They may also invest in stocks that are traded over-the-counter. The pools diversify their investments by allocating their equity strategies with consideration of the capitalization weightings of the S&P Composite1500 Index

The following summarizes the weightings of the pools as of September 30, 2021:

Active	52.7 %
Passive	47.3
Total	100.0 %
Large-Cap	63.9 %
Multi-Cap	30.9
Mid-Cap	2.9
Small-Cap	2.3
Total	100.0 %

The System's Domestic Equity pools total rate of return was 33.2% for the Pension Plan and 33.5% for the OPEB Plan for fiscal year 2021. This compared with 31.4% for the S&P Composite1500 Index.

At the close of fiscal year 2021, the Domestic Equity pools represented 23.0% of total investments. The following summarizes the System's 2.3% ownership share of the Domestic Equity pools at September 30, 2021:

## **Domestic Equity Pools**

(In thousands)

Short-Term Pooled Investments	\$ 18,238
Equities	484,867
Settlement Principal Payable	(270)
Settlement Proceeds Receivable	285
Accrued Dividends	439
Accrued Interest	-
Total	\$ 503,559

### INTERNATIONAL EQUITY POOLS

The objective for investments made in International Equity pools is to meet or exceed the total return of the MSCI ACWI Ex-US Net for one, three, and five-year periods and a market cycle.

For active management strategies, the objective is to earn returns that exceed the most relevant MSCI Index, adjusting for market capitalization, style and geography for one, three, and five-year periods and a market cycle. Another objective is to rank above median in a universe of managers possessing a similar market capitalization, style and geography characteristics.

Active exposure is invested primarily in equities or equity-related securities of non-U.S. companies through externally managed strategies..

## REPORT ON INVESTMENT ACTIVITY

The pools diversify their investments by allocating their equity strategies with consideration of the economic development status weightings of the MSCI ACWI ex USA Index.

The following summarizes the weightings of the pools as of September 30, 2021:

Active	75.2 %
Passive	24.8
Total	100.0 %
Developed	95.8 %
Emerging	4.2
Total	100.0 %

The System's International Equity pools total rate of return was 25.7% for the Pension and OPEB Plans for fiscal year 2021. This compared with 23.9% for the MSCI ACWI ex US Net.

At the close of fiscal year 2021, the International Equity pools represented 16.2% of total investments. The following summarizes the System's 2.3% ownership share of the International Equity Pools at September 30, 2021:

## International Equity Pools

(in thousands)

Short-Term Pooled Investments	\$	23,710
Equities		299,259
Fixed Income Securities		29,829
Market Value of Equity Contracts		3,298
Accrued Dividends and Interest		97
Total	\$	356,193

## **PRIVATE EQUITY POOLS**

The Private Equity pools objective is to meet or exceed the benchmark for all private equity investments over long time periods. The benchmark is the S&P 500 Index plus 300 basis points net of fees, lagged by three months over three, five, seven and ten-year periods and a market cycle.

Private Equity Investments are investments in the private equity market, primarily through limited partnerships. The following summarizes the weightings of the pools as of September 30, 2021:

Buyout Funds	47.6 %
Special Situation Funds	25.2
Fund of Funds	13.1
Venture Capital Funds	9.5
Liquidation Portfolio	3.1
Mezzanine Funds	1.5
Total	100.0 %

The Private Equity pools had a return of 53.7% for the Pension and OPEB Plans for the fiscal year ended September 30, 2021, versus the benchmark of 44.9%.

## REPORT ON INVESTMENT ACTIVITY

At the close of fiscal year 2021, the Private Equity pools represented 23.3% of total investments. The following summarizes the System's 2.8% ownership share of the Private Equity pools at September 30, 2021:

## **Private Equity Pools**

(in thousands)
Short Term Pooled Investments \$ 6,323
Equites \$ 503,835
Settlement Proceeds Receivable \$ 575

Total \$ 510,733

#### **REAL ESTATE AND INFRASTRUCTURE POOLS**

The objective of the Real Estate and Infrastructure pools is to provide diversification and favorable risk adjusted returns primarily through income and appreciation of investments. Investments are typically held through investment entities, such as limited partnerships or limited liability companies, established for the specific purpose of owning, leasing, managing, financing, or developing real estate and infrastructure related investments.

The Real Estate and Infrastructure pools diversify its holdings by:

- **Geography** The pools are invested globally and are diversified geographically so that it is not concentrated in a limited number of markets or geographic areas.
- **Size and Value** The pools diversify its holdings by size so that it is not concentrated in a limited number of large investments.
- Investment Type The pools are diversified by investment type as summarized below.

Total	100.0 %
Short term investments	1.1
Land	1.2
Retail shopping centers	4.5
Single family	2.5
Industrial warehouse buildings	20.9
Infrastructure	10.7
Hotel	8.2
Commercial office buildings	8.3
Multi-family apartments	42.6 %

The Real Estate and Infrastructure pools generated a return of 12.7% for the Pension and OPEB Plans for fiscal year 2021. The Real Estate and Infrastructure pools compare performance with two benchmark returns from the National Council of Real Estate Investment Fiduciaries (NCREIF): the NCREIF Property Index (less 130 basis points) was 10.7% and the NCREIF Fund Index - Open-End Diversified Core Equity (NFI-OCDE) was 13.6%.

## REPORT ON INVESTMENT ACTIVITY

At the close of fiscal year 2021, the Real Estate and Infrastructure pools represented 7.0% of total investments. The following summarizes the System's 2.3% ownership share of the Real Estate and Infrastructure pools at September 30, 2021:

#### Real Estate and Infrastructure Pools

(in thousands)

Short-Term Pooled Investments	\$	1,644
Real Estate Equities		135,738
Infrastructure Equities		16,420
Dividend Receivable		27
Total	\$	153,829

#### **FIXED INCOME POOLS**

The objective for investments made in the Fixed Income pools is to meet or exceed the Bloomberg US Aggregate Bond Index over one, three, and five-year periods and market cycles. Another objective is to rank above median in a nationally recognized universe of managers possessing a similar style.

For fixed income sub-strategies, the objective return is to meet or exceed the most relevant Bloomberg benchmark index.

The pools are invested primarily in fixed income securities of U.S. companies through internal and externally managed strategies. The goal is to build a portfolio of strategies that will provide excess returns relative to the blended benchmark while providing minimal tracking error to the index. At times a portion of the pool may be invested in exchange traded funds (ETFs) and fixed-income short-term securities with maturities of less than one year.

The pools invest in fixed income and related securities in a diversified portfolio of investment grade corporate issues, treasuries, agencies, government sponsored enterprises and government guaranteed mortgages. The pools diversify their investments by allocating their strategies with consideration of credit risk.

The System's Fixed Income pools total rate of return was 3.8% for the Pension and OPEB Plans for fiscal year 2021. This compared with (0.9)% for the Bloomberg US Aggregate Bond Index.

At the close of fiscal year 2021, the Fixed Income pools represented 10.1% of total investments. The following summarizes the System's 2.3% ownership share of the Fixed Income pools at September 30, 2021:

### Fixed Income Pools

(In thousands)

Total	\$	221,360
Accrued interest		434
Fixed Income Securities		218,314
Short-Term Pooled Investments	\$	2,612

## **ABSOLUTE RETURN POOLS**

The primary investment objective of the Absolute Return Strategies Pool is to generate a rate of return that meets or exceeds T-bills by 400 basis points net of fees over the one, three, and five-year periods and a market cycle. Another objective is to exceed the appropriate HFRI Fund of Funds Conservative Index median net of fees over one, three, and five-year periods and a market cycle.

The Absolute Return Strategies pool rate of return for the fiscal year was 15.3% for the Pension and OPEB Plans versus the benchmark's 12.4%. At the close of fiscal year 2021, the Absolute Return Pools represented 23.5% of

## REPORT ON INVESTMENT ACTIVITY

total investments. The following summarizes the System's 2.3% ownership share of the Absolute Return Pools at September 30, 2021:

#### Absolute Return Pools

(in thousands)

Short-Term Pooled Investments		\$ 1,721
Equities		115,512
Total	_	\$ 117,233

## **REAL RETURN AND OPPORTUNISTIC POOLS**

The primary investment objective of the Real Return and Opportunistic Pool is to generate a rate of return that meets or exceeds the increase in the CPI by at least four percent (4%) annually net of fees over one, three, and five-year periods and a market cycle. Opportunistic investments are targeted to earn a return that exceeds the current actuarial assumed rate of return, with the overall Real Return and Opportunistic Pool's benchmark an equal blend between the two benchmarks. If a peer universe is available, the objective is to rank above median in a nationally recognized universe of managers possessing a similar style

The Real Return and Opportunistic pool rate for the fiscal year was 23.5% for the Pension and OPEB Plans versus the benchmark's 8.3%.

At the close of fiscal year 2021, the Real Return and Opportunistic Pools represented 12.1% of total investments. The following summarizes the System's 2.3% ownership share of the Real Return and Opportunistic Pools at September 30, 2021.

## Real Return and Opportunistic Pools

(in thousands)

Short-Term Pooled Investments		;	2,967
Equities			262,944
Total	\$	;	265,911

#### **SHORT-TERM INVESTMENT POOLS**

The objective of the Short Term Investment pools is to closely match the return performance of its benchmark, the 30 day Treasury bill. The System's Short Term Investment pools return for the fiscal year was 0.2% for the Pension Plan and 0.2% for the OPEB Plan versus the benchmark's 0.1%.

Potential areas of investment are:

- Obligations of the United States or its agencies
- · Banker's acceptances, commercial accounts, certificates of deposit or depository receipts
- Repurchase agreements for the purchase of securities issued by the US government or its agencies
- Commercial paper rated at the time of purchase within the two highest classifications established by not less than two national rating services as determined by the State Treasurer
- Short duration investment grade corporate issues

## **REPORT ON INVESTMENT ACTIVITY**

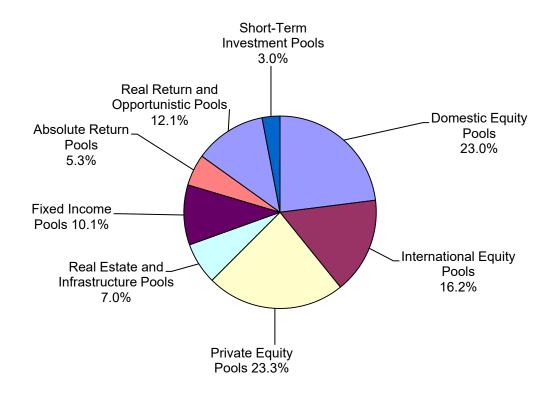

At the close of fiscal year 2021, the Short-Term Investment pools represented 3.0% of total investments. The following summarizes the System's 4.0% ownership share of the Short-Term Investment pools at September 30, 2021

## Short-Term Investment Pools

Total	\$ 64,711

A complete list of holdings is available from the Michigan Department of Treasury.

Largest Bond Holdings are exclusive of securities lending collateral.

The System's assets are commingled in various pooled accounts. Amounts, par value and number of shares represent the System's pro-rata share based on its ownership of the investment pools.

#### SCHEDULE OF INVESTMENT FEES

The State of Michigan Investment Board (Board) is the investment fiduciary and custodian of the System's funds pursuant to State law. Outside advisors are utilized to augment the State of Michigan's internal staff. 70.7% of the total investment portfolio is managed by fully discretionary outside advisors. The Michigan Department of Treasury's cost of operations applicable to the System for the fiscal year amounted to \$390 thousand or sixth and one tenths basis points (0.061%) of the fair value of the Assets under Management of the Board.

#### SCHEDULE OF INVESTMENT FEES

January 5, 2022

Ms. Michelle Lange, Acting Director
Department of Technology, Management and Budget
and
The Retirement Board
Michigan State Police Retirement System
P.O. Box 30171
Lansing, Michigan 48909

Ladies and Gentlemen:

The basic financial objective of the Michigan State Police Retirement System (SPRS) is to establish and receive contributions which when combined with present assets and future investment return will be sufficient to meet the financial obligations of the System to present and future benefit recipients. The progress towards meeting these financial objectives is illustrated in the Schedules of Funding Progress and the Schedules of Employer Contributions.

We performed actuarial funding valuations and issued actuarial funding reports for the SPRS pension and retiree health (i.e., OPEB) plans as of September 30, 2020. The purpose of the September 30, 2020 annual actuarial valuations was to determine the contribution requirements for the fiscal year ending September 30, 2023, to measure the System's funding progress, and to provide actuarial information in connection with applicable Governmental Accounting Standards Board statements. The valuations should not be relied upon for any other purpose. The valuation process develops employer contributions that are sufficient to fund the System's normal cost (i.e., the costs assigned by the valuation method to the year of service about to be rendered), as well as to fund any unfunded accrued liabilities over a reasonable period. The valuation was completed based upon population data, asset data and plan provisions in effect on September 30, 2020.

In addition to the funding valuation reports, separate reports are issued to provide financial reporting information for SPRS in accordance with Governmental Accounting Standards Board (GASB) Statement Nos. 67 and 68 (pension benefits) and Nos. 74 and 75 (retiree health benefits, or OPEB). Reports containing the actuarial results of the financial reporting valuations are produced annually after the publication of this letter. The GASB Statement Nos. 67, 68, 74 and 75 financial reporting valuations are based upon a measurement date of September 30, 2021.

The valuations were based upon information provided by the System's administrative staff concerning Systembenefit provisions, financial transactions, and individual members, terminated members, retirees and beneficiaries. We checked the data for internal and year to year consistency, but did not audit the data. As a result, we do not assume responsibility for the accuracy or completeness of the data provided by the System's administrative staff. The actuary summarizes and tabulates population data in order to analyze long term

trends. The System's auditor audits the actuarial data annually.

One Towne Square | Suite 800 | Southfield, Michigan 48076-3723

#### **ACTUARY'S CERTIFICATION**

Ms. Michelle Lange, Acting Director January 5, 2022 Page 2

Annual actuarial valuations are based upon assumptions regarding future activity in specific risk areas including the rate of investment return and payroll growth, eligibility for the various classes of benefits and longevity among retired lives. These assumptions are adopted by the Board and the Department after considering the advice of the actuary and other professionals. Each actuarial valuation takes into account all prior differences between actual and assumed experience in each risk area and adjusts the contribution requirements as needed.

The following schedules in the Financial Section, the Actuarial Section, and the Statistical Section of the Annual Comprehensive Financial Report (ACFR) were prepared by the Department of Financial Services based upon certain information presented in the previously mentioned funding and financial reporting valuation reports:

#### Financial Section

- Note 1 Table of System's Membership
- Note 4 Net Pension Liability; Summary of Actuarial Assumptions and Methods
- Note 5 Net OPEB Liability, Summary of Actuarial Assumptions and Methods
- Note A Methods and Assumptions Used to Determine Contributions for FY 2020
- Schedules of Changes in the Net Pension Liability (NPL) and the Net OPEB Liability and Related Ratios
- Schedules of Contributions Multiyear
- Sensitivity of the NPL to Changes in the Discount Rate
- Sensitivity of the Net OPEB Liability to Changes in the Discount Rate
- Sensitivity of the Net OPEB Liability to Changes in the Healthcare Cost Trend Rate Assumption

#### **Actuarial Section**

- Summary of Actuarial Assumptions and Methods used in the September 30, 2019 Pension Funding Valuation
- Percent of Eligible Active Members Retiring Within Next Year
- Separation from Active Employment Before Age and Service Retirement and Individual Pay Increase Assumptions
- Schedule of Active Member Pension Valuation Data
- Schedule of Changes in the Retirement Rolls
- Prioritized Solvency Tests
- Analyses of System Experience
- Schedule of Active Member OPEB Valuation Data
- Schedule of Changes in the OPEB Rolls
- Schedules of Funding Progress

#### Statistical Section

- Schedule of Retired Members by Type of Pension Benefit
- Schedule of Retired Members by Type of Health Benefit
- Schedules of Average Benefit Payments Pension, Medical/Rx, Dental, and Vision

### **ACTUARY'S CERTIFICATION**

Ms. Michelle Lange, Acting Director January 5, 2022 Page 3

The September 30, 2020 funding valuations and the September 30, 2021 financial reporting valuations were based upon assumptions that were recommended in connection with a study of System experience covering the period from October 1, 2012 through September 30, 2017. The pension investment return assumptions for the Non-Hybrid and Hybrid groups and the retiree health investment return assumption were updated beginning with the September 30, 2018 funding valuations in accordance with the Dedicated Gains Policy adopted by the Board of Trustees. Future actuarial measurements may differ significantly from those presented in the annual valuations due to such factors as experience differing from that anticipated by actuarial assumptions, or changes in plan provisions, actuarial assumptions/methods or applicable law. Due to the limited scope of the assignment, we did not perform an analysis of the potential range of future measurements.

The signing actuaries are independent of the plan sponsor.

The actuarial valuations of SPRS were performed by qualified actuaries in accordance with standards of practice prescribed by the Actuarial Standards Board and in compliance with applicable State statutes. The assumptions and methods used for funding and financial reporting purposes are in conformity with the Actuarial Standards of Practice issued by the Actuarial Standards Board. Louise M. Gates and Mita D. Drazilov are Members of the American Academy of Actuaries (MAAA) and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein. It is our opinion that the calculated employer contribution meets the financial objective of the Retirement System.

Respectfully submitted,

Louise M. Gates, ASA, FCA, MAAA

Mita D. Drazilov, ASA, FCA, MAAA

Mita Drazilor

#### **SUMMARY OF ACTUARIAL ASSUMPTIONS AND METHODS**

- 1. The investment return rate used in the pension valuation was 6.80% per year net of investment expenses (6.85% for the Hybrid Plan), compounded annually. This rate of return is not the assumed real rate of return. Considering a wage inflation assumption of 2.75%, this 6.80% investment return rate translates into an assumed real rate of return of 4.05% (4.10% for the Hybrid Plan). Adopted 2019.
- 2. The healthy life mortality table used in evaluating allowances to be paid were the RP-2014 Male Healthy Annuitant Mortality Table scaled by 95% and for females, the RP-2014 Female Healthy Annuitant Mortality Table scaled by 99%. Both tables were adjusted for mortality improvements using projection scale MP-2017 from 2006. Adopted 2018.
- 3. Sample probabilities of retirement with an age and service allowance are shown in Schedule 1 on the next page. Adopted 2018.
- 4. Sample probabilities of withdrawal from service and disability, together with individual pay increase assumptions, are shown in Schedule 2 on the next page. Adopted 2018.
- 5. Total active member payroll is assumed to increase 2.75% per year. This represents the portion of the individual pay increase assumptions attributable to inflation. Adopted 2018.
- 6. An individual entry age actuarial cost method of valuation was used in determining actuarial liabilities and normal cost. Adopted 1996. Unfunded actuarial accrued liabilities, including actuarial gains and losses, are financed over a declining 16-year period ending September 30, 2038. Adopted 2018.
- 7. The Department of Technology, Management & Budget approved the use of market value of assets as of September 30, 2006, for actuarial valuation purposes. For investment gains and losses that occur after that date, a 5-year smoothing technique will be used. Specifically, the excess (shortfall) of actual investment income (including interest, dividends, realized and unrealized gains or losses) over the imputed income at the valuation interest rate is considered the gain (loss), which is spread over five years. Adopted 2007.
- 8. The data about persons now covered and about present assets was furnished by the System's administrative staff. Although examined for general reasonableness, the data was not audited by the actuary.
- 9. The actuarial valuation computations were made by or under the supervision of a Member of the American Academy of Actuaries (MAAA). The assumptions used in the actuarial valuations were adopted by the System's Board and the Department of Technology, Management & Budget after consulting with the actuary.
- 10. A 5-year experience investigation, covering the period from October 1, 2012 through September 30, 2017, was completed in 2018. The purpose of the study was to analyze the actual experience of the System versus that anticipated by the actuarial assumptions then in use.
- 11. Gabriel Roeder Smith & Co. was awarded the actuarial and consulting services contract beginning October 4, 2006.

#### SUMMARY OF ACTUARIAL ASSUMPTIONS AND METHODS

#### SCHEDULE 1

#### PERCENT OF ELIGIBLE ACTIVE MEMBERS RETIRING WITHIN NEXT YEAR<sup>1</sup>

#### RETIREMENT AFTER 25 OR MORE YEARS OF SERVICE (NON PENSION PLUS PLAN)

Service	% Retiring
25	70%
26	60
27-39	35
40 and over	100

RETIREMENT AT OR AFTER AGE 50 WITH 10 YEARS OF SERVICE (NON PENSION PLUS PLAN) OR AFTER AGE 55 WITH 25 YEARS OF SERVICE (PENSION PLUS PLAN), OR AFTER AGE 60 WITH 10 YEARS OF SERVICE (PENSION PLUS PLAN)

Age	% Retiring
50	15%
51-52	20
53	25
54-59	30
60	40
61-64	50
65 and over	100

<sup>1</sup> Of those Non Pension Plus Plan members assumed to retire with 25 or more years of service, based on the percentages above, 70% are assumed to elect the DROP and 30% are assumed to retire without the DROP.

#### Notes:

No. refers to number of retiree health contracts

Annual allowances added to rolls includes increases due to medical inflation and contract changes.

Annual allowances removed from rolls includes decreases due to contract changes.

<sup>&</sup>lt;sup>1</sup> Annual allowance amounts are not available for fiscal years 2011 and prior.

#### PRIORITIZED SOLVENCY TEST

The System's funding objective is to meet long-term benefit promises through contributions that remain approximately level from year to year as a percent of member payroll. If the contributions to the System are level in concept and soundly executed, the System will pay all promised benefits when due, the ultimate test of financial soundness. Testing for level contribution rates is the long-term solvency test.

A prioritized solvency test is another means of checking a system's progress under its funding program. In a short condition test, the plan's present assets (cash and investments) are compared with: (1) active member contributions on deposit; (2) the liabilities for future benefits to present retired lives; and (3) the liabilities for service already rendered by active and inactive members. In a system that has been following the discipline of level percent of payroll financing, the liabilities for active member contributions on deposit (liability 1) and the liabilities for future benefits to present retired lives (liability 2) will be fully covered by present assets (except in rare circumstances). In addition, the liabilities for service already rendered by active members (liability 3) are normally partially covered by the remainder of present assets. Generally, if the System has been using level-cost financing, the funded portion of liability 3 will increase over time. Liability 3 being fully funded is not necessarily a by-product of level percent of payroll funding methods.

The schedules that follow illustrate the history of the liabilities of the System and are indicative of the System's policy of following the discipline of level percent of payroll financing.

## ANALYSIS OF SYSTEM EXPERIENCE - PENSION

## GAINS/(LOSSES) IN ACCRUED LIABILITIES

During Year Ended September 30, 2020 Resulting from Differences Between Assumed Experience & Actual Experience

	Type of Activity	Gain/(Loss)
1.	<b>Retirements</b> (including Disability Retirement). If members retire at older ages or with lower final average pay than assumed, there is a gain. If younger ages or higher average pays, a loss.	\$ (6,340,060)
2.	<b>Withdrawal From Employment</b> (including death-in-service). If more liabilities are released by withdrawals and deaths than assumed, there is a gain. If smaller releases, a loss.	137,745
3.	<b>Pay Increases</b> If there are smaller pay increases than assumed, there is a gain. If greater increases, a loss.	(11,604,192)
4.	<b>Investment Income</b> If there is greater investment income than assumed, there is a gain. If less income, a loss.	(9,029,936)
5.	<b>Death After Retirement</b> If retirants live longer than assumed, there is a loss. If not as long, a gain.	(5,273,548)
6.	<b>New Entrants/Rehires</b> New entrants into the System will generally result in an actuarial loss.	
7.	<b>Other</b> Miscellaneous gains and losses resulting from data adjustments, timing of financial transactions, etc.	(209,333)
8.	Composite Gain (or Loss) During Year	\$ (33,319,324)

## ANALYSIS OF SYSTEM EXPERIENCE - OPEB

## GAINS/(LOSSES) IN ACCRUED LIABILITIES

During Year Ended September 30, 2020 Resulting from Differences Between Assumed Experience & Actual Experience

	Type of Activity	Gain/(Loss)
1.	<b>Premiums</b> Gains and losses resulting from actual premiums in valuation year versus that assumed from prior valuation.	\$ 54,728,659
2.	<b>Investment Income</b> If there is greater investment income than assumed, there is a gain. If less income, a loss.	(1,661,492)
3.	<b>Demographic and Other</b> Gains and losses resulting from demographic experience, data adjustments, timing of financial transactions, etc.	5,009,218
4.	Composite Gain (or Loss) During Year	\$ 58,076,385

#### **SUMMARY OF PLAN PROVISIONS**

Our actuarial valuation of the System as of September 30, 2020, is based on the present provisions of the Michigan State Police Retirement Act (Public Act 182 of 1986, as amended).

#### REGULAR RETIREMENT

(No reduction factor for age)

- Eligibility 25 years of credited service with no age requirement; or age 50 with 10 years credited service.
- Mandatory Retirement Age None.
- **Annual Amount** If member has 25 or more years of credited service, 60% of final average compensation; if member has less than 25 years of credited service, total credited service times 2% of final average compensation.
- Final Average Compensation Average of 2 final years.

#### **EARLY RETIREMENT**

Eligibility – None.

#### **DEFERRED RETIREMENT**

(Vested benefit)

- Eligibility 10 years of credited service, benefit commences at age 50.
- Annual Amount Regular retirement benefit based on service and final average compensation at time of termination.

### **DUTY DISABILITY RETIREMENT**

- Eligibility No age or service requirement; in receipt of workers' disability compensation.
- **Annual Amount** 60% of final average compensation, disability benefit plus workers' compensation benefit, if any, shall not exceed 100% of final average compensation.

#### NONDUTY DISABILITY RETIREMENT

- Eligibility 10 years of credited service.
- Annual Amount 2.4% of final average compensation times years of credited service, to a maximum of 60% of final average compensation.

#### **DUTY DEATH BEFORE RETIREMENT**

- Eligibility No age or service requirement.
- Annual Amount 60% of final average compensation is payable to surviving spouse; additional \$1,200 per year for each child under 18 is also payable; If no surviving spouse, children under 18 share in 60% benefit until attainment of age 18. If no spouse or children, dependent parents are eligible for 60% benefit (plus \$1,200 per dependent sibling under 18). Retirement benefit plus workers' compensation, if any, shall not exceed 100% of final average compensation.
- Lump Sum Payment A \$1,500 funeral benefit is also payable.

#### NONDUTY DEATH BEFORE RETIREMENT

- **Eligibility** 10 years of credited service.
- Annual Amount 2.4% of final average compensation times years of credited service, to a maximum of 60% of final average compensation, payable to surviving spouse; If no surviving spouse, children under 18 share in benefit until attainment of age 18.

#### DEATH AFTER RETIREMENT

The retired member's benefit continues to the surviving spouse. If no surviving spouse, children under 18 share in the continued benefit until attainment of age 18.

#### SUMMARY OF PLAN PROVISIONS

#### **DROP PROGRAM PROVISIONS**

- DROP Eligibility Any age with 25 years of service.
- Maximum\_Years\_of DROP 6 years.
- Retirement Benefit Monthly benefit frozen at date of DROP election.
- **DROP Account Amount credited** 100% of the participant's Retirement Benefit if stay full six years (for all 6 years); 90% if stay 5 years; 80% if stay 4 years; 70% if stay 3 years; 60% if stay 2 years; 50% if stay 1 year; 30% if stay less than 1 year.
- Interest Credit Rate 3% annually
- COLA No COLA adjustment on Retirement Benefit until the end of the DROP period.
- **Benefit\_Options** At termination of DROP participation and commencement of retirement, options are lump sum of DROP account, partial lump sum, or maintain funds in account.

#### POSTRETIREMENT COST-OF-LIVING ADJUSTMENTS

All members retiring (or leaving employment with vested benefits), and their survivors, are eligible for automatic 2% annual (non-compounded) benefit increases, with a maximum annual increase of \$500.

#### POSTRETIREMENT HEALTHCARE BENEFITS

Persons in receipt of retirement allowances (including members who did not retire directly from the System, but come from a vested deferred status), and their dependents, are eligible for 95% State-paid health insurance coverage and 90% State-paid dental and vision insurance.

#### **Member Contributions**

**Non Pension Plus Members** – Command Officers currently participate on a noncontributory basis. Effective October 1, 2012, troopers and sergeants hired before June 10, 2012 began contributing 1% of

- their compensation. Effective October 1, 2013 troopers and sergeants hired before June 10, 2012 began contributing 2% of their compensation.
- **Pension Plus Members** Troopers hired on or after June 10, 2012 contribute 4% of their compensation. These contributions are for the pension component of their plan.

#### **CONTENTS**

This part of the System's annual comprehensive financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the System's overall financial health.

#### FINANCIAL TRENDS

These schedules contain trend information to help the reader understand how the System's financial performance and fiscal health has changed over time. The schedules are presented for the last ten fiscal years. Schedules included are:

- Schedule of Pension Plan Additions by Source
- Schedule of OPEB Plan Additions by Source
- Schedule of Pension Plan Deductions by Type
- Schedule of OPEB Plan Deductions by Type
- Schedule of Changes in Fiduciary Net Position Pension Plan
- Schedule of Changes in Fiduciary Net Position OPEB Plan
- Schedule of Pension Benefit and Refunds by Type
- Schedule of OPEB Benefits and Refunds by Type

#### **OPERATING INFORMATION**

These schedules contain contextual information to assist the reader's understanding of how the System's financial information relates to the combination of participating members and the benefits it provides. Schedules are presented for the last ten fiscal years, except where noted. Schedules included are:

- Schedule of Retired Members by Type of Pension Benefits
- Schedule of Retired Members by Type of Other Postemployment Benefits
- Schedule of Other Postemployment Benefits
- Schedule of Average Benefit Payments Pension
- Schedule of Average Benefit Payments Health
- Schedule of Average Benefit Payments Dental
- Schedule of Average Benefit Payments Vision
